

the COIN DEALER newsletter

MONTHLY SUPPLEMENT

JANUARY - 1992

Vol. XVII No. 1

Single copy price: \$3.50

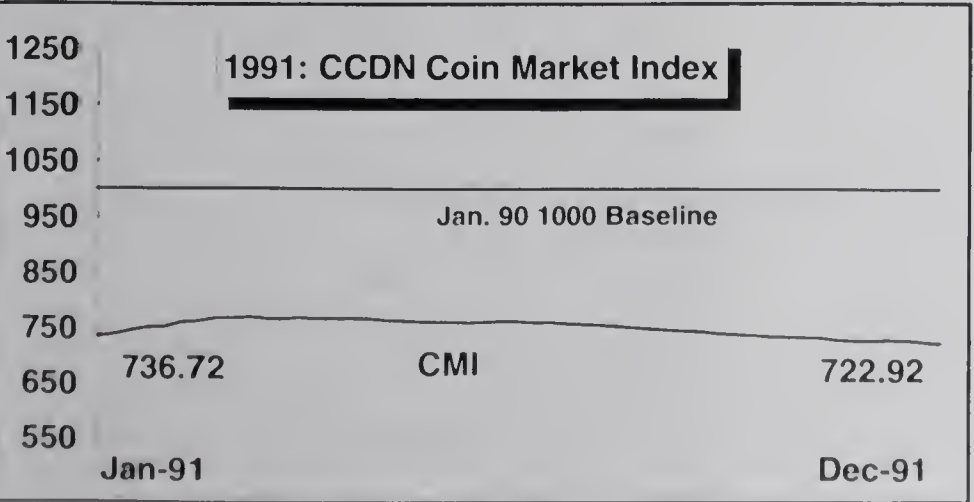

1991: Lions & Tigers & Bears, Oh My!

Well, *at least it's over*. Most dealers have survived 1991, although it was definitely not a happy experience. The problems plaguing the general economy spilled over into the rare coin business. Profitability, which had been predicated on the continuing interest and dollars of the *investor*, disappeared along with most of the investors. The fickle nature of the investor proved to be the undoing for many a dealer, and their desertion helped to decrease demand while increasing supply. Anyone who still thought of coins as *rare* wasn't sitting on an inventory full of them; an inventory that *seemed* to be worth a little less every week.

Curiously enough, 1991 didn't start badly. There was increased activity and higher Bid levels during January and February. Optimism was starting to build, and dealers had high hopes that 1990 had seen the bottom of this cycle. Alas, that was just not to be. Just about the time that momentum seemed to be swinging in favor of the Bulls, it seems that fresh money all but dried up. One dealer, perhaps stretching the truth just a bit, told us that he could name the day that it happened - the morning that customers stopped coming into his shop. In fact, according to his tale, he actually went to the front door to make sure that it wasn't locked! That's the kind of a year that it was.

There was some good news from the market. A few dealers, who had devoted themselves over many years to cultivating dedicated collectors, were probably hurt the least. It may not have been a great year for them, but at least they were continuing to turn coins. In fact, the dealers who survived the best were those who were willing to cut their profits (or take their losses) and reinvest in coins that were more in tune with market interest and demand levels. The dealer who held the largest inventory on behalf of his customers, and who expected to receive a premium price in exchange for his services, was hurt the most. 1991 was definitely a year that rewarded running a lean operation.

How did the overall coin market do during 1991? The CCDn Coin Market Indicator, appearing weekly in the *Certified Coin Dealer newsletter*, tracks Bid prices on more than 10,000 coins every week, and has proven over the past two years to be an accurate representation of the entire market. The news this year was not good. The CMI started 1991 at 736.72, down from the initial 1000 level at the start of 1990. It managed to rise to 770.34, before beginning a slow downward spiral; at least the intense volatility that characterized 1990 seems to have become subdued. The CMI ended at 722.92, down only 13.80 points over the year.

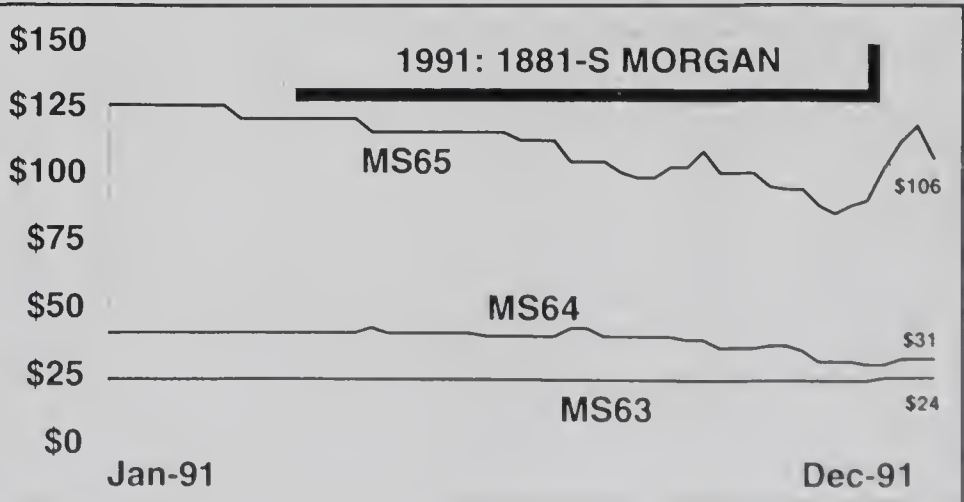

The individual series that make up the CMI showed few surprises, with the volatility generally lower than during 1990:

	Jan.91	Dec.91	Point Change		Jan.91	Dec.91	Point Change
Silver Commems	679.15	647.89	-31.26	Gold Commems	758.43	599.61	-158.82
Morgan Dollars	676.04	763.81	+87.77	Peace Dollars	628.61	632.96	+4.35
Mint State Type	806.39	789.24	-17.15	Mint Gold Type	622.06	569.88	-52.18
Proof Type	777.76	765.88	-11.88	Proof Gold Type	831.37	717.38	-113.99
Buffalo Nickels	714.33	754.71	+40.38	Mercury Dimes	794.33	787.91	-6.42
Walking Liberty Halves	717.76	733.99	+16.23	Proof Singles	818.21	721.28	-96.93
PL Morgans	536.08	677.03	+140.95	Early Gold	785.84	842.69	+56.85
Better Date	896.92	862.91	-34.01	Matte Proof	778.36	796.60	+18.24
Standing Liberty Quarters	673.15	641.55	-31.60	Franklin Halves	711.11	597.27	-113.84
Saint-Gaudens	791.87	832.90	+41.03				

Gold Commemoratives showed the largest individual drop, but their weakness was evident throughout the year; fortunately, few Bidders were fooled by the repeated auction appearances of Gem specimens that were recycled through reserves. Proof Gold Type seems to have suffered from the lower demand for high-priced items. Franklin Halves showed a large drop that can only be explained by increased supply and lower demand. The biggest surprise on the 'plus' side has to be Prooflike Morgans; after a dismal showing in 1990, demand for PLs has been increasing.

One of the leading market indicators continues to be MS65 Morgan Dollars, and they fulfilled their duty for much of the year. Then KAPOW! After dropping to as low as \$80 Bid, MS65 Morgans began to move upward in early November. Strong demand coupled with a small floating supply in the marketplace pushed Bid up to \$118 in three weeks, an incredible 47.5% increase! As supply began to move into the market, prices returned to the low hundreds by early December; and by the end of the month, Morgans had settled in at the \$106 level. Hindsight makes for wonderful investments, and any contrarian with the fortitude to buy in at \$80 saw his bravery rewarded handsomely. While this type of profit reminds us of the investment possibilities of rare coins, it also has very little to do with the collectors who provided the bread-and-butter of most of the business for the year. One dealer, who is very fond of thoroughbreds, observed that he preferred that this kind of excitement be left on the track!

One of the other series that clearly signals the health of the U.S. coin market is Mint State Gold Type. Too many coin shops, and too many collectors are holding entirely too much gold to ignore these movements. Gold started 1991 at \$385.25, and ended at \$358.75 in our year-end CDN. In between it moved up a bit and down a bit, but not even a major Gulf War could get a serious rise out of it. Gold coins reflected both the pessimism of the coin market and the lethargy of the underlying bullion. Two representative coins are the MS63

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

1991: LIONS & TIGERS & BEARS, OH MY! (continued)

Double Eagles of St. Gaudens and the Type 3 Liberty. The Saints started 1991 Bid at \$560 and ended at \$445; the Libs started at \$675 and ended with Bid at \$655. The CCDN CMI for Mint State Gold ended down 52 points on the year.

One of the bright spots in the coin market continued to be auction sales. There is no question that many of the dollars that were disappearing from the retail sales were showing up at the auction block. Perhaps the disappearance of the investor brought the spotlight to bear on the advanced collector, and the advanced collector has discovered that many of his numismatic needs can be satisfied in a cost-effective manner at auction sales. If this trend continues, it will radically change the nature of the coin business in America. This is one trend that all dealers will need to follow. Auction Houses took a dramatic step towards insuring the continued health of their aspect of the numismatic market when the PNG promulgated even higher ethical standards for auction sales. These new policies will help the efforts of the individual houses in eliminating the false market information created by reserve Bids.

Sales at the leading Auction Houses again demonstrated the strength of this market segment, although the major firms are approaching the market with very different techniques. Auctions by Bowers & Merena held 5 major sales, and when combined with their Kingswood Galleries Mail Bid sales, found new homes for \$20.1 million in numismatic properties; their concept of the "Grand Format" auction catalogues continues to attract major consignors and bidders. Heritage Numismatic Auctions produced thirteen sales during 1991, ten of which were their Bullet sales, for a total Prices Realized of \$12.2 million; the success of their Bullet concept, with its lower production costs and rapid 'turn-around' seemed appropriate for starting what analysts are predicting to be the "no-frills" decade. Stack's produced 11 sales (including their Coin Galleries sales) during 1991, with total Prices Realized of \$23.9 million; the concept of a 'monthly' sale still appeals greatly to collectors, as it allows them to pace their purchases, and attend as many sales as possible. Superior Galleries reported sales of \$38.1 million in their 8 numismatic auctions. Superior is branching out into auctions for Autographs & Documents, as well as Sports Memorabilia.

There are years when Proof Sets send very different market information than Morgan Dollars, or Mint State Gold. The lower Bid on the earlier set at year's end probably reflects the fact that many

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax). The Coin Dealer Newsletter (USPS# pending) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Application to mail at Second-Class postage rates is pending at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

Address all subscription remittances to:

higher-priced items were hurt by the overall declining market. We remarked many times in our editorials that coins valued around \$200-\$700 (or thereabouts) seemed to be sustaining the most collector interest, while the higher-priced coins were being hit harder. Looking at the Proof Sets of the '80s, a pattern is hard to discern; it appears that those that didn't go up or down stayed the same. Sort of like the coin market, come to think of it.

Dealers and collectors looking for profit opportunities in 1992 would be well-advised to follow one simple piece of advice. Look at those issues that have a demonstrated track-record of being popular with collectors, and then look for ratios that are 'out-of-sync'. *Undervalued* is a relative term, but such items can be found by the skillful buyer. Looking at the chart for Barber Types, it is easy to discern the narrowing spreads throughout the year; the dip in Bid for Quarters in late November, however, would look excessive to the 'chartist', who would expect a rebound. To make such searching easier, the Coin Dealer Newsletter has begun publishing weekly charts (on Page 3) that trace the Bid history of selected issues since 1980. Analysis of long-term trends can lead to the most astute purchases when assembling a collection, and ultimately, long-term profits.

All in all, 1991 was a year to be remembered for reminding dealers where the strength of their business lay, and a year to be forgotten as soon as possible. Change is always difficult, and most dealers had to change their way of doing business this year. It was a year in which the COIN itself was dethroned; the rediscovery of the fact that the Customer is King may have been unsettling to some, but that is the way of the capitalistic world.

Flying Eagle and Indian Cents: American Classics

By Richard Snow

The Flying Eagle and Indian Cent series is one of the more widely collected series in American numismatics. In strong or weak coin market cycles, the demand for this series has remained high. The strength of this market reflects mostly collector demand. In one measure of collector interest, **The Flying Eagle and Indian Cent Collectors Society** (popularly known as "The Fly-In Club") has finished its first year with over 300 charter members (persons interested in membership may send \$15 to The Fly-In Club c/o Allstate, 3848 E. 5th. St., Tucson, AZ 85716). Aside from their beauty and history, collectors are excited about Indian Cents because of the stability of prices. Prices of tough-date Indians in collector grades (VF - MS-65) have remained strong throughout the turbulent price swings of the past 15 years.

Beginner collectors are initially drawn to Indian Cents due to their design difference from the long-running Lincoln Cent series. They find that most of the 1880-1909 coins are very inexpensive. As the collection takes shape, the easy dates are obtained and then upgraded. Soon, the collector finds that all they need to complete the set are the scarce issues in the 1870s, and the 1856 Flying Eagle Cent. The completion of a quality circulated set takes patience, a reasonable budget and a lot of searching. The heavy buying activity in circulated Indians is by collectors interested in chocolate-brown examples without problems.

The popular Flying Eagle Cent is collected as part of the same series as the Indian Cent because of its shortness, being only a 3-year type issue. The change from the old coppers to the Flying Eagle Cent is one of the important coinage changes in history. The Mint Act of 1857 called for the redemption of all the foreign silver in circulation; a plethora of miscellaneous foreign coinage circulated side by side with Federal coinage up until that time. The exchange of the old Large Cents and Half Cents with Copper-Nickel Cents was also called for at that time. Later, during the Civil War, coinage supplies dried up due to hoarding. The Copper-Nickel Cent disappeared from circulation, replaced by privately manufactured tokens. The Bronze Cent, inspired by these Civil War tokens, was issued in 1864. This was our nation's first 'token' coin.

Beyond the circulated set is the very tough Mint State set. The Bronze issues come in various colors ranging from brilliant red to solid brown. Between these colors are varying amounts of red and brown. The amount of original red color the coin has, is as important to the price as the technical grade. The *Coin Dealer Newsletter* lists Mint State prices for brown coins in MS-60 and MS-63, and red-brown for MS-64 and MS-65. Full red coins will trade for higher prices than those listed. Some dates will trade for 2 or 3 times the red-brown price when the coin is a full red without problems.

Not all of the color variations of Mint State pieces are a result of their care and storage by their previous owners. The streaky toning seen on many early dates is a result of the Mint's source of the Bronze; between 1864 and 1871, the stockpile of old Large Cents and Half Cents were melted and recoinced into the Bronze Cent and the new Two Cent piece. The issues from these years usually show streaky 'woodgrain' toning due to improperly mixed tin and zinc alloy. From 1872 until 1877, the Mint, having no more Large Cents to melt, resorted to melting the 1864-1871 Bronze Cent and Two Cent pieces to supply the coinage needs. The color on these issues can vary from bright gold to streaky red and brown. In 1878, the Mint started to have outside manufacturers supply the Cent planchets. This was done because of the diminishing copper stockpile, and to relieve workers from the increased burden of the silver dollar production called for in the Bland-Allison Act. The quality of the planchets improved considerably.

Proof Cents were issued for all dates except the two San Francisco Indians. The Flying Eagles are very rare in proof, with the 1858 Large Letter variety being the toughest (with an estimated mintage of only 80 pieces). PCGS only recently started designating the difference between 1858 proof Large Letters and Small Letters; many of the reported Small Letter proofs are actually Large Letters. In the Indian set, the pre-1870 Cents are the scarcest of the proof issues. The real stopper is the proof 1864-L, with only 20 pieces minted. The dates from 1870 onward are usually available. Most collectors will include the proof issues in their sets because of the lack of quality business strike examples for the tougher dates in the 1870s.

Typically, proof Bronze Indian Cents come with small dark spots of corrosion that range in size from flyspecks to larger carbon spots. These spots are the result of impurities in the air attaching to the surface of the coin. A person talking or sneezing over an unprotected coin will probably leave tiny droplets of saliva on the coin, that will later turn into non-removable carbon spots. These spots are commonly encountered, so the collector should not reject these coins outright; the unspotted example may not be available. For some scarce dates, you may have to pay a significant premium for unspotted examples.

The colors in these proof Bronze issues also range from brown to full red, with the majority being red-brown. Some of the early dates come with a streaky toning associated with an improperly mixed batch of Bronze. Later dates will sometimes come with iridescent purple toning from the Mint wrappers. To find attractive proofs in full red is very difficult.

Pricing of the proof issues requires a little research. The type price for proof Copper-Nickel pieces is used for the common 1862

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax). The Coin Dealer Newsletter (USPS # pending) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Application to mail at Second-Class postage rates is pending at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

Address all subscription remittances to:

Flying Eagle and Indian Cents: American Classics (continued)

piece, while the other dates may trade slightly higher. The prices for the proof issues from 1866 to 1878 follow the Mint State pricing structure. The 1864 Bronze and 1865 proof issues are priced much higher than the Mint State prices. The proofs after 1878 follow the type coin pricing. The rare 1864-L has traded for as much as \$40,000.

To expand their set, many people are collecting the varieties in the series. Overdates, doubled dies, repunched dates, and other interesting and valuable varieties are all sought by many collectors. The popular varieties like 1858/7, 1869/69, 1888/7 bring very high premiums. The king of the Indian Cent series is the 1873 Closed 3 doubled LIBERTY. A PCGS-64 specimen recently sold for well over \$10,000; varieties so rare in Mint State could soar in a hot market. Other varieties bring substantial premiums as well. The 1860 Indian with a pointed-bust (as in the 1859 style head) is scarce. The 1873 Closed 3 in non-proof is scarce as well. The 1886 type 2 with the last feather pointing between the CA in AMERICA is also a scarce variety in high grade. Other varieties that are bringing premiums are the doubled die varieties of 1857, 1858, 1865, 1866, 1868, 1870, 1873, 1880, 1887, and 1891. Many issues come with repunched dates, some of which bring high premiums. The information on Flying Eagle and Indian Cents is being gathered and reported through The Fly-In Club, a specialty club devoted to this series. A reference book on Flying Eagle and Indian Cents (by this author) is due later this year.

The scope of a collection of these coins does not stop with the Mint State set, proof set, or even the varieties set. Many collectors are assembling sets of the pattern issues. The most popular are the 1856 Flying Eagle, 1858 transitional 12 piece set, and the 1859 transitional issue. Other pattern issues are collected, but not as an integral part of the regular series.

The 1856 Flying Eagle, although not actually a regular issue, has always been collected as part of the regular series. The premium value of this coin was well known as early as 1858. The 1856 Cent was trading for \$2, which was a normal day's wage at that time. Collecting of American coins took off, due in part to excitement from the escalating value of this coin. Today the 1856 is still one of the most popular coins in the entire U.S. series. The actual mintage has never been known, but by careful analysis the amount made is concluded to be about 1000 Proofs and 400 non-proof pieces. The coin is always in demand, and paying a premium is always required (unless the coin has problems).

The Mint, seeing the profit potential in supplying fancy pieces to collectors, started producing proof issues regularly in 1858. The same year, the Mint produced a set of Pattern Cents that included the first use of the Indian head design. The most popular of coins in the set are the transitional patterns, which have the obverse of the regular issue Flying Eagle or Indian Head paired with the regular reverse. Current trading levels for the non-transitional pieces are \$1000-1200 in PR-63, \$1400-1600 in PR-64, and

\$2000-2500 in PR-65. The transitional pieces trade at \$1400-1600 in PR-63, \$1800-2200 in PR-64, and \$2600-3000 in PR-65.

When the design of the Indian Cent changed again in 1860 to the shield and oak wreath reverse, another transitional pattern was struck with the 1859 obverse and the new reverse. These are common as patterns go, with about 300 pieces struck. Some collectors include this issue in their set, but it has nowhere near the popularity of the 1856 Flying Eagle. The trading range for the non-proof pieces are \$750-800 in MS-63, \$800-1000 in MS-64, and \$1300-1600 in MS-65. When compared to the regular issues, these seem very inexpensive.

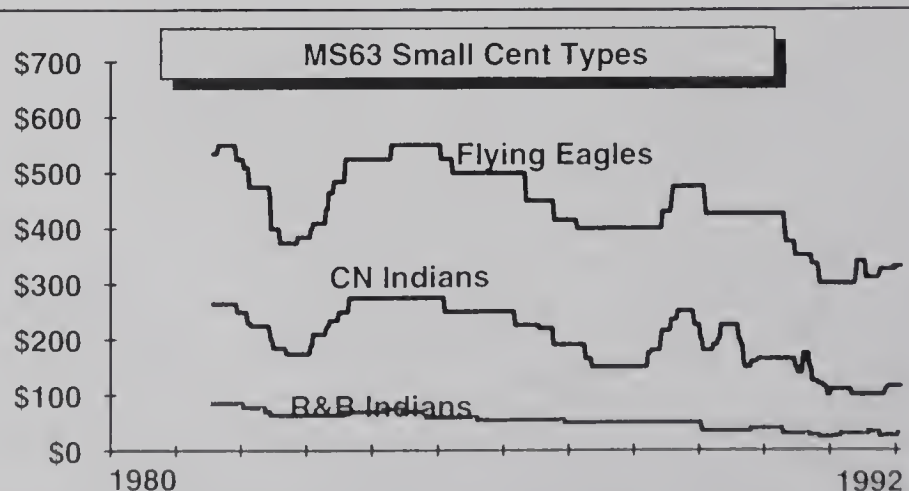

The Flying Eagle and Indian Cent collection can be as challenging as you want to make it! This challenge attracts many collectors, and investors as well. The availability of most dates makes completing the set a realistic goal. The proofs and patterns can keep one's interest beyond just the Mint State set. The years that the series covers are the most historically interesting of our country. The designs used are some of the most beautiful used by any country. These Cents are surely American Classics!

Richard Snow

The Fly-In Club

c/o Allstate Coin Co.

3848 E. 5th. St., Tucson, AZ 85716

Editor's Note: While the "Fly-In" types trended downward during the 1980s, it should be noted that strong collector demand allowed them to outperform many other coins. Recent demand has started prices rising again.

It's Now or Never

The 1992 Numismatic Dealer Directory is going to press within the month, and now is your last chance to make corrections in your listings. Address changes? Staff Changes? Telephone Area-Code changing? Let us know now!

And with the coin market heating up, can you really afford to be without a display Ad in the '92 NDD? Remember, this is the most cost-effective way to reach our entire mailing list for one entire year. Call now before you lose your opportunity until 1993.

Please return this card.
Verify that all corrections or
changes have been made legibly.

LIBERTY SEATED HALF-DOLLARS Types & Temptations

In the August & Sept. 1991 issues of the CDN Monthly Supplement, we continued our study of Gobrecht's 'designs' for the Liberty Seated Coinage. In this article, we will look at some of the special issues involved in the Liberty Seated Half-Dollar Types, as well as additional MS65 & PR65 pricing charts. All of the population statistics are a combination of PCGS and NGC reports.

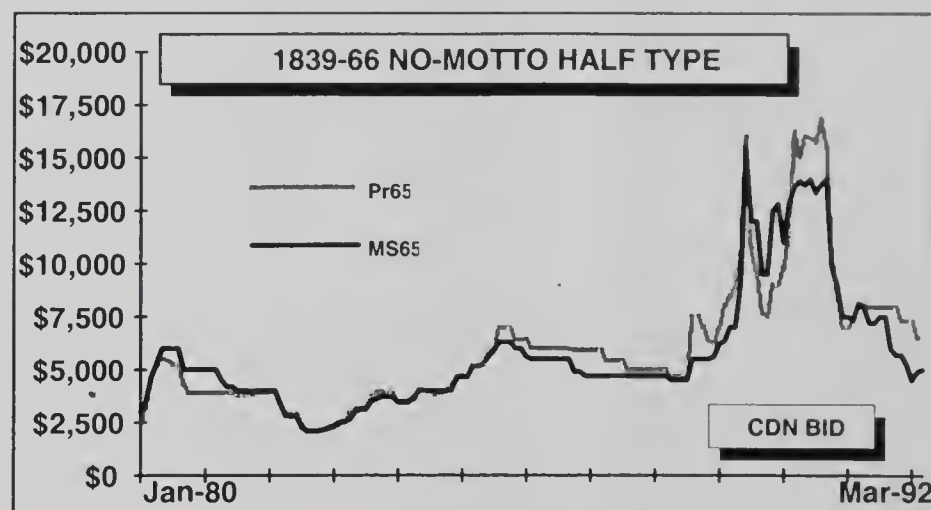

Liberty Seated Half-Dollars were produced between 1839 and 1891. During these years of change and growth in America, our coinage changed along with the country. Design differences in the Liberty Seated Halves, although they follow the general patterns that we have already examined in the Half-Dime, Dime, and Quarter denominations, present some interesting and unique aspects. Of course, it wouldn't be the Liberty Seated series if we weren't talking about something peculiar.

Mint Engraver Christian Gobrecht must have been a very busy man. Rising to the post of Second Engraver in 1835 (after Kneass' stroke), he was confronted with several important projects. In addition to the expanding requirements of producing working dies, Gobrecht was also about to begin his redesign of the nation's silver coinage. In the Fall of 1836, after he had already begun work on his Liberty Seated design, Gobrecht also finished work on his design for a new half-dollar design following Reich's Bust design. This was intended to be a very different coin for many reasons; this coinage was intended to be produced with steam machinery, and at the new weight standard then under consideration by Congress. The story of the introduction of steam machinery into the Mint is worthy of an entire article in itself. Suffice then, that the advantages of steam coinage were demonstrated in the eighteenth century, which explains why it took our Government four more decades to act.

As we discussed in the March 1991 *Monthly Summary* article that started this series, Gobrecht coupled his interpretation of Thomas Sully's Liberty Seated concept on the Obverse, with a variation on Reich's much older Eagle design (as modified by Kneass) on the Reverse. The Half-Dollar obverses were initially designed with stars, raising the question of the varying designs on the different denominations. There is a certain level of comfort in having the same design on each silver coin, if not an emotional one. The artistic truth is that style does not always translate well when sizes are changed. The open fields of the Half-Dime or Dime are small in size, and the design works; a no-stars design on a coin the size of a dollar or half-dollar leaves the fields too open, too naked.

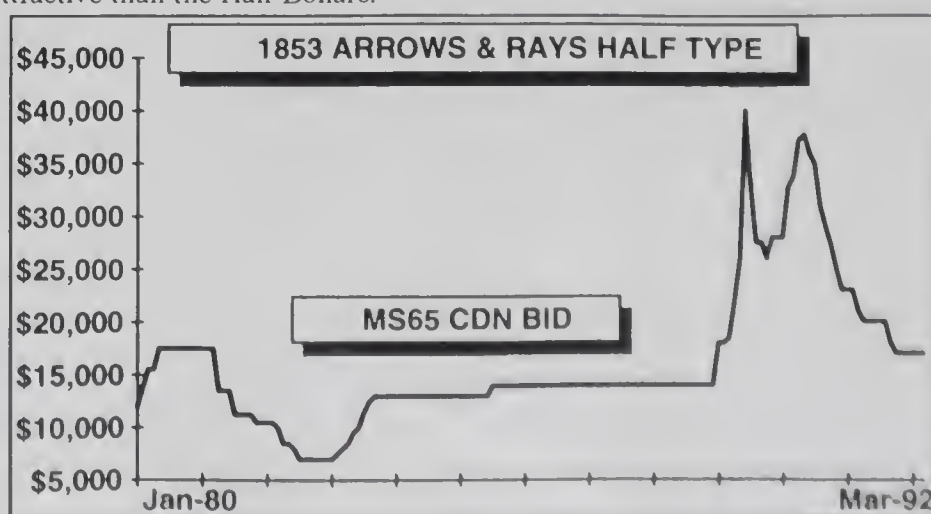

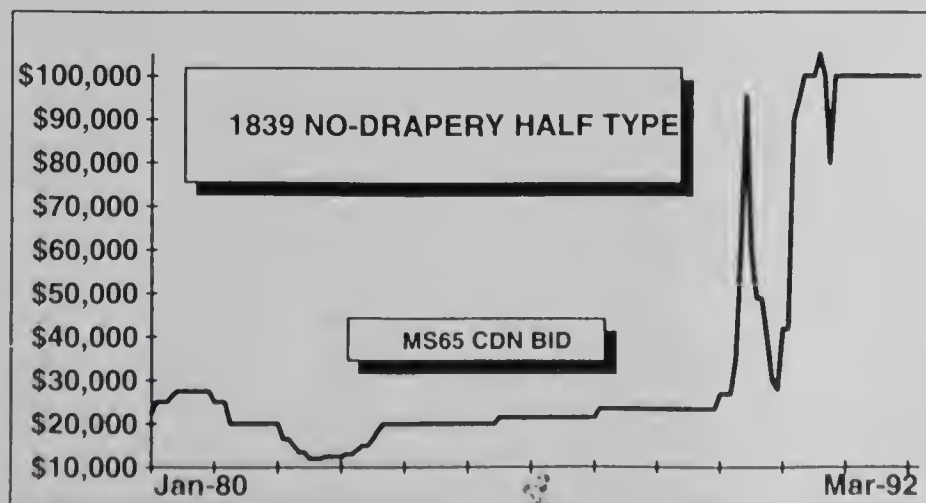

A legitimate question concerns the order in which Gobrecht 'rolled out' his design. The usefulness of the Half-Dollar would seem to have secured it a more prominent role. Still, some denomination had to be 'last'. While we may never understand the rationale, there may have been one advantage to being last. The Half-Dollar design, like the other denominations, started out with no 'extra drapery' at Ms. Liberty's elbow, while subsequent dies show the added bit of cloth. However, the Half seems to have been spared most of the alterations visited upon the design by Robert Ball Hughes. The Half remains the truest representation of the original Gobrecht-Sully design. The rarity of Gem (MS-65) No Drapery Types is immediately evident from the Population Reports, with only 1 specimen certified. The pricing history of this coin during the early 1980s is a result of the market trends; the Bids toward the end of the decade reflect the population count. The value of a unique item is established by just two people - the buyer and the seller.

The No-Motto design type (also known as the Extra Drapery or Drapery Below Elbow Type), dates 1839-1852 and 1856-1866, although it contains two separate reverse 'mini-varieties'. Small Letter reverses were used from the first issues through 1841. In 1842, the Half Dollar reverses began to bear Large Letters, which continued through 1891. Some numismatists attribute the change to Hughes, and while we know he preferred a pudgy Liberty, can we be sure he felt the same way about the alphabet? The more significant question is why he mostly left the Half Dollar alone when he mucked up the other denominations. Production of this design Type was 'interrupted' by the issues of 1853-1855, and then resumed from 1856-1866.

The No-Motto Type in Gem condition tells us a great deal about the coin market. As of the latest population reports, 129 coins have been certified as MS65. This is small enough to be genuinely rare, but large enough to be an accurate market indicator. The No-Motto Gems started the decade Bid at \$3,000 (the No-Motto Quarters, with a current population of 130, were likewise Bid at \$2,800). By May, Bid had doubled to \$6,000, finished the year at \$5,000 and sank to \$2,100 before the end of 1982. Within one year, Bid had risen to \$3,700, and then slowly rose to the 1985 rally peak of \$6,300. They spent much of the next two years around \$4,700. They started 1989 Bid at \$6,200, and by June reached 15,500. As was the case with so many Type coins, the peaks during 1989 could not be sustained. Bid dropped to \$9,500 before rising again to the \$14,000 level, ultimately to drop below \$6,000. Proof No-Motto Half-Dollars, certified as Proof65, show a current Population count of 69. The Gem Proofs have followed the same Bidding profile as their Mint State counterparts. Over the nearly twelve years we studied, Bid would ultimately rise from \$2,500 to around \$8,000, with some excitement in between. In fact, the close correlation between Bids for Gem Mint State and Proof specimens (on these and the following Types) suggests that Type collectors are more interested in design and grade than they are in the method of manufacture.

As related previously, the discovery of Gold in California profoundly affected the design of our silver coins. As silver began to rise in price (as gold relatively declined), numismatic treasures and trash alike went into the melting pots (\$100 face value of silver coin would yield more than \$106 as bullion!). Congress, following Mint Director Eckert's recommendation, reduced the silver content of American coinage about 7% in the Act of Feb. 21, 1853. Mint Engraver James Longacre was directed by Eckert to prepare dies with Arrows flanking the obverse date and Rays surrounding the reverse Eagle to indicate the changed weight. Numismatists love the Arrows and Rays Design, and on no denomination is it more attractive than the Half-Dollars.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax). The Coin Dealer Newsletter (USPS # pending) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Application to mail at Second-Class postage rates is pending at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

Liberty Seated Half-Dollars Types & Temptations (continued)

Arrows & Rays Halves in Gem condition are rare; numismatists have known for a long time that all Arrows and Rays coins are rare in Gem. In circulated grades, the 1853s are almost common; as a Gem, only 10 have been certified. The rarity of the 1853 A&R doesn't show any special movement, however, in their Bid history; their profile matches that of the market trends. Their rarity seems to have sustained them a bit better following the 1989 peak, but ultimately Bid dropped as severely as on coins with much greater populations. Perhaps this is a coin whose price as a rarity suffers because of the large number of lower-grade specimens; the fault certainly cannot lie in the beauty of the specimens. We never point to any one particular coin as a 'sleeper', but we cannot help but hear a little snoring going on somewhere in this vicinity.

Newly appointed Mint Director Snowden ordered the removal of the reverse Rays after 1853, but continued the obverse Arrows Only design through 1855 (when the Arrows were removed as well). Breen has suggested that the reason for this may lie with decreased die life due to the changes; it may be pointless to look for any logic in undoing what was illogical to do in the first place. The 'lighter' weight, No-Arrows, No-Motto coins of 1856-1866 are technically a separate Type, although not a 'design' type. Longacre's new hubs for the silver denominations, created between 1858-1861 (possibly with some assistance from Anthony Paquet), included a new Half Dollar reverse with some slight modifications. The No-Arrows, 1853 weight standard, No-Motto Half Dollars minted between 1856-1866, are technically a design type, but the minute differences seem to appeal only to the specialist. While increased silver production in California meant that melting would no longer be a problem, coinage production during the Civil War years was limited by other problems (including hoarding). The most interesting aspect of the 1856-1866 coins lies in the history of the New Orleans Mint and the coinage of the Confederacy. That, too, is a subject worthy of many articles.

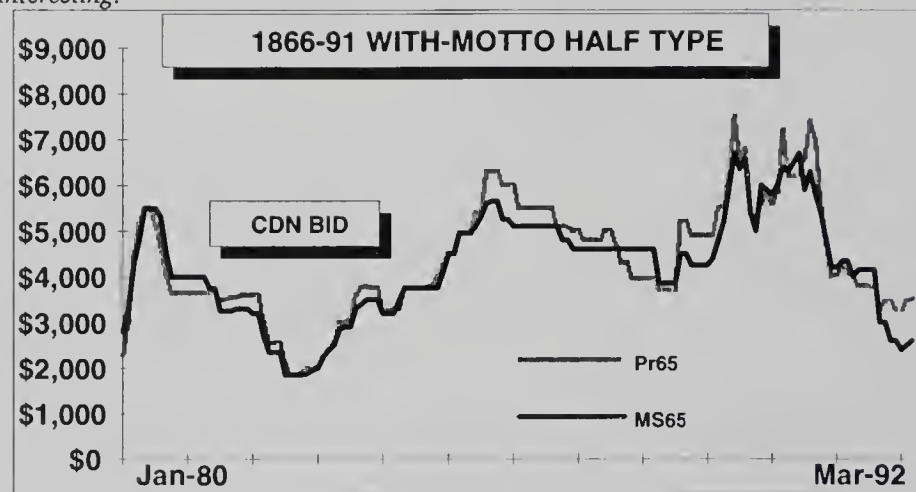

The Arrows Type Half Dollar of 1854 & 1855, in Gem condition, is certainly not common, with only 35 certified, but it does have a population more than three times that of the 1853 Type. The Bidding history of the '54-55 follows the general pattern of the coin market, with only a few interesting aspects. The '54-55 began 1980 Bid one-third of the 1853 Type, but has recently (and on previous occasions) Bid as high as one-half of the 1853 Bid. This might be a significant ratio to watch. Also interesting is the relatively low growth shown during the 1989 Rally; the '54-55 reached a substantially higher peak in the 1990 Rally. Bid is currently below \$8,000.

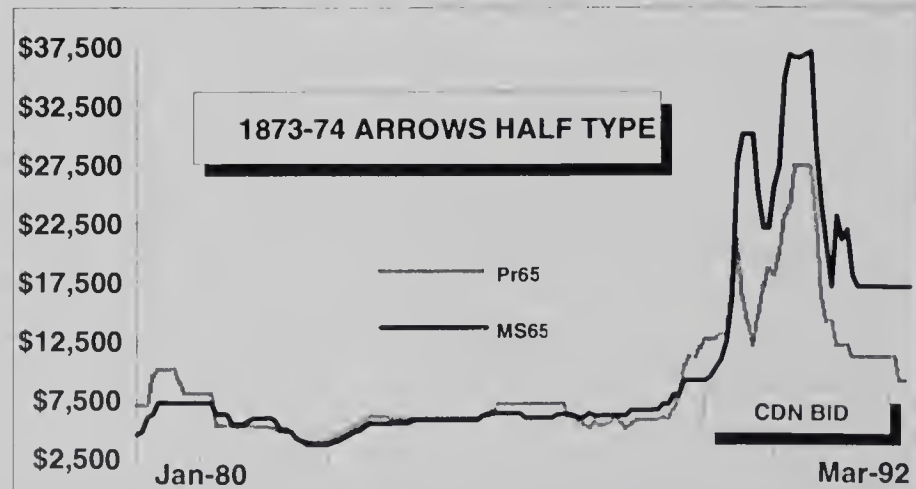

The Mint Act of March 3, 1865, might be called an 'omnibus' numismatic tour de force. Among its provisions was the creation of the 3-cent nickel coinage, compound interest notes, and the addition of the motto "IN GOD WE TRUST" to most U.S. Coinage. Like much Mint activity, it is not easy to explain why the 2-cent piece was the first struck with the motto; the act stipulated coins of sufficient size, which the Mint interpreted as silver denominations above the Dime and gold coins above the \$3.

Bids for the With Motto Type Half Dollar in Gem have been, like the same Type in the Seated Quarter, exciting. With 334 certified Mint State Gems, and 452

Proof Gems, this is hardly a "rare" coin on the order of the 1853 A&R. Since 1980, Bid has generally followed market trends, but with a greater degree of volatility than seen in the other types; this is behavior that one would expect from the lowest population types, not the highest. Perhaps the higher population allows for more strenuous marketing efforts. Two observations spring to mind. The graph convincingly shows the near identical Bid history of the Mint State and Proof examples. The Mint State coins were Bid in 1980 at \$2,800, and current Bid is \$3,000; the Proof Gems have done a little better. The decade in between, in a word, was interesting.

Production of the With-Motto Type, 1866-1891, was of course interrupted by the 1873-74 Arrows (or Arrows & Motto) Type. As we have previously stated, the Mint Act of 1873, among its other provisions, was ostensibly trying to provide a more metric basis for coinage weight. The new weights stipulated were easily within the legal production tolerances of the old weights, so practically speaking, the new standards were meaningless. Despite the virtual identical weights, the Mint brought back the 1854-55 concept of Arrow punches to alert the public to the change; perhaps it is just as well that they did, otherwise even fewer would have noticed or cared.

With a certified population of only 7 pieces in Mint State Gem, and only 18 pieces in Proof Gem, the Arrows Type of 1873-74 is rare for a two-year Type, and much rarer than its 1854-55 counterpart. The relative rarity seems to have been fully recognized only with the population reports, and the coins soared in value during the Rallies of 1989 and 1990. Bid remains substantially higher than in 1980.

The Liberty Seated Half provides some very unique challenges in assembling a complete Type set in Gem, with such low populations on the No-Drapery, Arrows & Rays, and Arrows of 1873-74 Types. If money is no object, a matched set is possible. While we have not examined Bidding history in grades below MS/PR65, the complete Type set of Halves becomes more practical. Like the Liberty Seated Quarter Type set, the Half Dollar series provides sufficient variation to make it visually interesting, and you still cannot find a better cast of rogues.

The Liberty Seated Dollar will be examined in a future issue.

Single copy price: \$3.50

In Eighteen Hundred Ninety-Two, Columbus Saled On A Coin Oh So New

Coins, and especially Commemorative coins, strongly reflect the values of the governments and peoples who create them. That means they are, of necessity, very political creations; anytime two numismatists gather to discuss Commems, you can be sure that strong opinions will be expressed. Over the Commem-issuing decades of the Twentieth century, numismatists have seen a fascinating cast of characters involved in the authorization, design, production, and distribution of Commems. Not a few of the individuals have been self-promoters; others could only charitably be called thieves. Miscreants perhaps, but they are as much a part of our rich numismatic heritage as Christian Gobrecht or Peter the Eagle. And it is refreshing to note that the controversy that always seems to surround Commemorative coinage remains, even with the newest issues of our generation.

Commemoratives form a fascinating part of our American numismatic heritage, and many a collector has been introduced to coin collecting through exposure to Commems. In many cases, a specimen of that very first Commemorative issue, the Columbian Exposition Half Dollar, was the coin that ignited the collecting spark. Thanks to an enormous mintage, the Columbian Half has also served as a low-cost introduction to specializing in Commemorative coinage. While no one would argue that the dollar is worth what it once was, there is something appealing about the Columbian having been sold for double face, even if that 'hefty profit' did raise a few eyebrows at the time. Imagine how popular Commemorative coins would be today (and from there, the rest of numismatics) if they were issued at a comparable level. And speaking of making Commemoratives popular, there is no underestimating the positive results on market demand that come from the publication of a major reference book; last year's distribution of Q. David Bowers' *Commemorative Coins of the United States - A Complete Encyclopedia*, was announced with a noticeable rise in market prices. There is also an interesting heritage 'sidebar' to the story of the Columbian Commems - the Authorizing Act of August 5, 1892 required that the planchets be produced from silver melted down from obsolete coin stock on hand; in other words, an 1847/6 half, or perhaps two Arrows and Rays quarters, may have been melted to produce your Columbian.

The idea of a World's Exposition to honor Columbus began to gather momentum in 1890. Such expositions were certainly popular with the public, as Philadelphia had amply demonstrated in 1876 with their Centennial Exposition. This was another chance for America to flex its growing industrial and technical might before the world. Several cities competed for the privilege of hosting the Exposition, and Congress chose Chicago in the Spring of 1890. Starting with 626 acres of empty lakeshore, architects developed a miniature city - more than 150 buildings, many constructed in the classical style. Housing 65,000 exhibits, many of the buildings were connected by canals, on which could be found an interesting assortment of steam-powered craft and gondolas. Would Columbus be so honored today?

Budding numismatists at the Columbian Exposition would have been especially fascinated with the U.S. Mint Exhibit, featuring an 1804 \$1 and the 1849 \$20, and would have been sure to pick up one of the souvenir medals produced on the coining press there. Hopefully, they would not have arrived at the Exposition too early. Despite an expenditure of \$30 million, the Exposition wasn't ready for the public at the time of its dedication on Oct. 21, 1892; the paying public was first admitted on May 1, 1893!

The idea for a "souvenir" half dollar was suggested by the Exposition's Manager, who had hoped they could be used as admission tokens; planning big, he thought that a mintage of 40 million would take care of the crowds at the gates (28 million of whom did attend!). The Authorizing Act called for a maximum combined mintage of 5-million coins, still an enormous quantity (the 1982 Commemorative Half honoring George Washington's 250th birthday had a maximum authorized mintage of 10 million!) During late 1892 (Nov. 19-Dec. 31, according to Breen), the U.S. Mint produced 949,896 business strikes plus a reported 103 Proofs. The timing of the mintage is of some interest. From the passage of the Authorizing Act, it took the Mint just a little more than three months to spring into action. With the opening delayed, what excitement the Commems generated was still useful. With an additional 4 million specimens authorized, the Mint really swung into production with the 1893 Columbians, ultimately striking 4,050,000 plus 2,105 for assay purposes. After melting, Breen gives us a net mintage of 1,548,300 plus 1 proof.

The Columbian Commems were to be sold for \$1 each, with the profits going to defray the expenses of staging the Exposition - this would have been an interesting way to cover the full \$30 million! The low price did have the advantage of seeing the coins widely dispersed, and combined with the large mintages, some periods of great economic distress over the intervening years, the accidental spending of souvenirs, and bank releases at face value made the Columbian the most common Commem to find in circulated condition. A dealer at a recent convention had one entire display case filled with several thousand well-circulated examples, and numismatic lore is filled with stories of enormous hoards. There is some small irony in the fact that you need to advance in history more than half a century, to the last of the *classic* Commems, to find coins also selling this cheaply. In an age where we simply accept Commemorative coins as being non-circulating Legal Tender, just think of the interest in coin collecting that might be generated by having Commemoratives occasionally passing in circulation. Anything that gets the public to *look* at their coins would be of benefit to the hobby.

One of the interesting facts surrounding Columbus is that no accurate portrait exists; or to be a little less precise, that many varying portraits exist. I grew up supposing that Columbus looked exactly as Charles Barber's classic bust portrayed him. According to Breen, Barber's fictitious Columbus was modelled "after a plaster model by Olin Levi Warner (1844-96) in the Chicago Historical Society, allegedly after a photograph of Jeronimo Sunel's statue in Madrid, this in turn based on Charles Legrand's fanciful portrait in the Madrid Naval Museum." Hard to get more accurate than that. Newspapers of the time reflected on the design, and found it to be wanting; to be less polite, both Columbus and coin were deemed ugly. From an aesthetic viewpoint, Barber really made a virtue of simplicity in his depiction of the old 'sea-dog'. The design is such that it is almost timeless; it simply isn't possible to assign any particular school of design to the effort.

George Morgan's reverse is deceptively simple. His rendition of the Santa Maria was based on the replica made by Spain for the 1892 Exposition, which in turn seems reasonably close to the replica that is currently cruising American

CONSULTING EDITOR—Edward Judd GRAPHICS—Shane Downing
CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

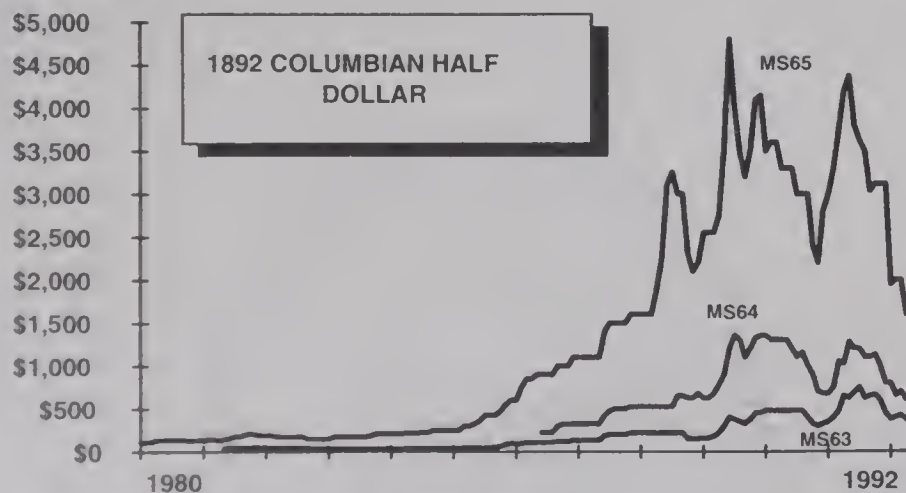

In Eighteen Hundred Ninety-Two Columbus Saied On A Coin Oh So New

(continued)

waters (also courtesy of someone else's government, I might add!). Morgan also gives adequate homage to the concepts of voyage and discovery, especially in relationship to the two hemispheres symbolically connecting the Old and New Worlds. Add to this the very nice touch of reflecting the heritage of the Pillar Dollar and you have a design that is simple, elegant, and timeless. At first glance, this may not be great art, but it serves the purpose and it endures - hard to demand much more than that.

No story of the Columbian Commem would be complete without at least a mention of the \$10,000 paid by the Remington typewriter concern for the first proof specimen. Such a publicity stunt, at a level that represented an average workman's lifetime earning capacity, was sure to make newspapers across the country. Any reader desiring the full details of this publicity stunt is recommended to Bowers' new reference. That the coins were eagerly awaited may be demonstrated by the Exposition staff rushing to fill over 5,000 standing orders for about 750,000 coins.

While striking #1 may have commanded a substantial premium, there is no denying that Columbian Halves are about as common as 'rare coins' can get. Yet over the last decade, the true rarity of premium quality specimens became more evident. In 1980, a Gem 1892 Columbian was Bid at \$110; today, after an extremely volatile four years, Bid is around \$1,600. It may be assumed that the component of volatility due to Anniversary marketing efforts may be behind us now, and hopefully Bid will follow a steadier track. As the following chart demonstrates, the abundance of XF/AU and MS60 specimens in the marketplace has resulted in much greater stability in their prices.

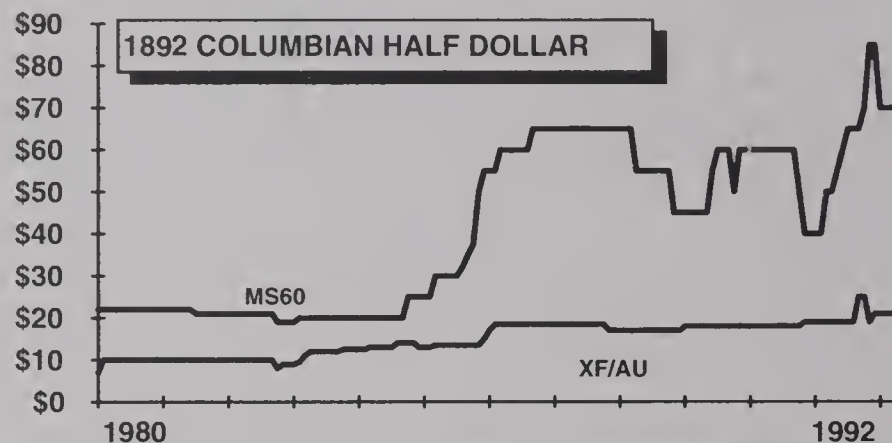

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax). The Coin Dealer Newsletter (USPS # pending) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Application to mail at Second-Class postage rates is pending at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

While the prices for the 1892 and 1893 specimens have remained remarkably similar over the years, the MS65s have shown some volatility since 1988 (relative to each other). From 1980 to 1988, the two coins trace a single line, but at mid-1988, the 1893 began to soar; it remained higher until early 1991, when Bid declined below the 1892 levels. Whether consistency or volatility dominates future pricing, there will be opportunity here for some lucky investor.

One of the fun aspects of a collection specializing in the World's Columbian Exposition is the vast array of both numismatic and non-coin material available. Medals, tokens, coins, passes, tickets, scarves, books, booklets, souvenirs, certificates - all are available in the marketplace at very reasonable prices. But for sheer curiosity value, it is hard to beat the mate to the Columbian Half Dollar - the *Isabella Quarter*. Everything about this Commemorative coin makes it interesting. First, the date of 1893 - is this the 401st Anniversary of Columbus' landing, or perhaps the 402nd Anniversary of her approval of the voyage? Much has been written about the propriety of placing the image of a foreign monarch on the coins of a Republic, so there's no need to belabor the point. But wouldn't it be interesting, two hundred years hence, to find George III's bust on an American Commemorative - after all, can you think of a single individual more responsible for our country's creation?

Even more fascinating is the Quarter's reverse. The Exposition's Board of Lady Managers is worthy of a study all by itself, and Susan B. Anthony's efforts in lobbying Congress for its creation is a story told elsewhere. This coin is the closest that one can come to finding any trace of the Women's Suffrage movement on our coinage (before 1979, at least). Is it an accident that the idealized woman on the reverse is carrying the tools of the spinner? Is the spindle to be viewed as a symbol of female virtue, skill, or oppression? Was Barber suggesting that a woman's place is by the spinning wheel? Is this an example of a coin 'strongly reflecting the values of the governments and peoples who create them'? And what does this have to do with Queen Isabella? Oh well, it's still a really neat coin, especially if you have a sense of humor.

Surviving Coin Market Cycles: A Few Recommendations

by Mark Salzberg
President, NGC

America's recent Recession has challenged all coin dealers, as the public suddenly became pre-occupied with the possibility of major economic turmoil. Concern grew as large numbers of workers lost their jobs, and business earnings plummeted. Faced with all this economic uncertainty, discretionary purchases in many areas of collectibles suffered.

Every day I talk to *dozens* of dealers, and many of them have shared with me their tips for surviving the Recession. Not every "pointer" will be applicable to every situation, but this is how many survived during these economic hard times. In fact, the survivors all shared another common opinion: *a correction was to be expected after such a tremendous bull market in coins!* The market has been rising now for several months, but many of these strategies are still applicable. I hope you find some of their suggestions beneficial.

PLAN YOUR LEVEL OF PREPAREDNESS

The number one recommendation of the dealers was to **encourage and assist the collector**. For many years, and with many dealers, concern with investors replaced attention to collectors. This is understandable, since time spent with the investor-clients often produced returns far superior to time spent with collectors. With only so many hours in the day, dealers naturally gravitated to the clients who produced the greatest profits. When the investors 'suddenly' disappeared, dealers had to scramble to find 'new' clients. And who did they discover? The collector! **Remember, the collector will be there when no one else is.**

Educate your customers on the wonderful history of coins. And coins do have a wonderful history - a history that is at least as important a selling feature as expected rates of return or predictions of profits. The losses of the last few years have made one thing abundantly clear - it is hard to sell coins as an investment when their recent track record demonstrates losses. Dealers know that coin pricing is cyclical, and that the best time to buy is when prices are low, but it is difficult to make contrarian investors out of conservative clients. The best way to give your customers a good reason to buy coins is to **turn your clients into collectors.**

Orient your clients to a three to five year approach. Actually, this time span should be considered a minimum and not a maximum. As I mentioned above, it is no secret that coin prices are cyclical. As an investor seeking to maximize returns, it makes sense to buy at the absolute bottom and sell at the absolute top. Of course, in practical terms, it is almost impossible to time buying or selling that precisely, and most collectors don't even try! Nobody can be absolutely sure when a market has peaked or bottomed; the collector is more concerned with

buying rarer items when they are available to add to his collection. We can be certain, however, that long-range holding of rare coins presents greater profit opportunities. In fact, the really great fortunes in numismatics have been made by collectors who assembled their collections over long periods of time - sometimes several decades. Coins, when held long-term over many decades, have offered spectacular rates of return. Coins bought one year and sold the next seldom provide anything but losses. **Think long-term for fun and profit.**

Recommend that your clients **sell coins**. Many dealers still think of their clients as having a collector mentality - a profile that means clients buy coins for many years, and then, when their enthusiasm has waned, all the coins are sold at once. Perhaps it is because some dealers hesitate to recommend selling selected coins for fear that it will make the client stop buying. Nothing could be further from the truth. If an opportunity exists for a client to realize profits, at least talk to him about the possibilities. Collectors often move into different specialties, making sales of earlier collections possible. The client may decide to hold, but knowing that profits are possible can make further sales that much easier. Everybody likes to back a winner, and **profit-taking creates buying enthusiasm.**

Encourage your clients to **buy coins based on historical value**. We can assign two different meanings to this same statement. First, coins are surviving pieces of history - bits of human culture that survive long after their makers have turned to dust. Coins remind us of our past, in all its glory, in all its ignominy. But because they exert that tremendous appeal of the past, they have also proven to have a very respectable long-term history of appreciation. Short-term market volatility, reflecting waves of demand acting on a limited supply of rare coins, can drive prices up or down very quickly. Quick profits are great, but quick losses are a remarkable deterrent to further sales. A long-term view of coin values, with time smoothing out many of the cyclical movements, shows coins to be a remarkable investment - and it is even more remarkable in that **coins are fun to collect.**

Advise your customers to **buy the coin and not the holder**. As President of NGC, you can bet that I'm proud of our company and the numismatic services that we provide - just as other companies are proud of their services. That said, it helps no one, neither dealer, nor customer, nor certification service, when negative comments are made. The plain truth, made even plainer by the demise of several grading services, is that customers will always come out ahead when they buy the coin and not the holder. A quality coin is always a quality coin, regardless of the shape, size or color of the holder. Customers tune-in to negative comments, which may prevent them from feeling comfortable with the products. Do everyone a favor and **avoid the politics.**

Remember your customers with **numismatic books or trade journal subscriptions**. Businessmen know that it takes money to make money, and that an educated client is your best client. Educating your client is your obligation (and hopefully

the COIN DEALER newsletter MONTHLY SUPPLEMENT

EXECUTIVE DIRECTOR—Pauline Miladin PUBLISHER—Ron Downing
EDITOR—Dennis R. Baker ANALYST—Robert Korver
CONSULTING EDITOR—Edward Judd GRAPHICS—Shane Downing
CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

Surviving Coin Market Cycles: A Few Recommendations (continued)

your joy). Do it because the client deserves it, and because it will help increase your profits. The more your customer knows about coins, the more he or she will feel comfortable buying them. And the more your customer knows about the wonderful history of coins, the more they will want to collect them. You may not have time to turn all of your customers into numismatic geniuses, but you can **buy the book** for them before or after they buy the coin!

All of these suggestions can be summarized through one concept: *Establish the importance of customer relations*. You shouldn't simply be selling coins; you should be developing a numismatic relationship with that customer. A long-term relationship will make your customer grow in numismatic knowledge. As his portfolio or collection grows, so will your profits! **Promote customer knowledge.**

UNDERSTAND BUSINESS CONCEPTS

Many dealers *became* dealers because they were having so much fun as collectors or investors. There is nothing wrong with this, as long as they realize that what made them successful collectors *may not* make them successful dealers. However, there is no under-estimating the importance of loving the material, and *letting your customers know it*.

Numismatics is a business, and like all businesses, coin dealers must understand basic business concepts. Dealers often need to establish a *business* relationship with a banker, because banks have been notoriously finicky about lending money to coin dealers. To a banker, a dollar is worth a dollar, and as soon as they find out that you want that loan to spend \$100,000 for *one* dollar, they get *real nervous*. You have got to show them that you have a professional's grasp of overhead, turnover (or turnaround), inventory management, financing, and investment. A collector can buy a loser and sit on it long enough to turn it into a big winner; a dealer has to be able to turn his inventory in order to meet expenses. That is one enormous difference between a hobby and a **business**.

Contribute to the **reputation and growth of the numismatic industry**. Coin dealers have a long tradition of being very independent. There is nothing wrong with that, as long as you realize that it takes a healthy industry to promote healthy dealers. Any opportunity that you have to educate people about coins will ultimately be repaid. People don't wake up one morning, look themselves in the mirror, and decide to start investing in rare coins. They need to be exposed to the possibilities. Volunteer to speak at your local coin club to educate *numismatists*, and at civic organizations to educate the *public*. Make sure that your local Boy Scouts all earn their merit badges in coin collecting.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax). The Coin Dealer Newsletter (USPS # pending) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Application to mail at Second-Class postage rates is pending at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

Address all subscription remittances to:

Study other markets, such as the stock market. Coins tend to be an all consuming passion, and many dealers forget that a much larger world lies outside the door to the coin shop. If you have a firm grasp of events in other collectible and investment markets, you will better understand how coins fit into the overall investment universe. By being better informed yourself, you will be able to communicate more effectively with your educated clients, and you will have additional opportunities to educate these clients. By being better informed about world history, you will be able to better inform your customers about the events that are reflected by the coins. You can increase your profits by **broadening your investment perspective**, and **you can dramatically increase your clients' pleasure by educating them about their collections.**

It is also critically important to have **superior knowledge of the numismatic world**. We all know that we cannot be experts on every aspect of numismatics, but that doesn't deny our responsibility to be experts in our chosen market segment. It is important to have current information on the overall numismatic market, as well as our areas of specialization. We wouldn't presume to tell dealers what to buy or sell coins for, but we will observe that knowing current market values is *very important*. Offering too low a price for material that is being price-shopped can make you *appear* unethical; charging too much for material can rapidly make you unemployed. There are reasonable profits to be made in the coin business, and profit remains the driving engine of capitalism. Your customers will spend their hard-earned dollars with dealers who are **price competitive**.

Create a comfortable and trustworthy environment for your clients. Many a collector or investor has hesitated (or passed!) on really good coin deals because they didn't feel comfortable with the dealer. After all, you may be asking your clients to spend enormous sums of money with you. They have a right to be treated in a professional fashion. Image will never replace knowledge, but it is important; many dealers of various investment products have succeeded short-term by displaying image where no knowledge existed, but you will need both to maximize your long-term growth. Your personal image may have nothing to do with your numismatic knowledge, but it does **reflect on your level of professionalism**.

I appreciate this opportunity to pass along many of the comments and recommendations that I was able to gather from our dealer network. I was impressed by the quality of these suggestions, and frankly, found that many of them represented simple common sense (which is too often neither simple nor common!). I hope that you have found these suggestions to be "on target" and useful.

Mark Salzberg, Numismatic Guaranty Corp.

MONTHLY SUPPLEMENT *newsletter*

Vol. XVII No. 6

JUNE 12, 1992

Single copy price: \$3.50

Gobrecht's Masterpieces In Metal and Liberty Seated Dollars

This article concludes our evaluation of the Liberty Seated coinage. Previous issues of the CDN Monthly Supplement covered other denominations: March 1991, Half-Dimes; May-June 1991, Dimes; August-September 1991, Quarter Dollars; March 1992, Half Dollars.

Gobrecht's Liberty Seated Dollars. Some collectors find them the duller of the Seated denominations, with few of the overt varieties that make numismatic life more interesting. Others find the Dollars offer their own unique problems (rarities, Originals v. Restrikes, etc.), and to be incredibly challenging when trying to complete a matched set (the combination of rare dates and hard wear!). Either way, the Dollar is an integral part of the Gobrecht story, and perhaps the most fascinating part at that!

After years spent reworking John Reich's Bust designs and preparing large numbers of working dies, Christian Gobrecht (1785-1844) was given the opportunity (in the mid-1830s) to design a new national coinage. Mint Director Robert Patterson obtained a drawing of a seated Liberty by Thomas Sully, which Gobrecht translated into a coinage design. Preparing the Dollar first is not entirely surprising; it was the standard of our national currency, a coin that would represent *American ideals* in local transactions to international trade. The Half Dollar was more *useful*; the Dollar was more *symbolic*. Offsetting Sully's British influence, Gobrecht's choice of Peter (the 'Mint Eagle') for the Reverse, so soon after his untimely demise, must have seemed a fitting tribute.

Gobrecht signed the first of four working dies, in the field between the date and Liberty's rocky perch, with C.GOBRECHT F. (the F representing the Latin *fecit*, "he made it", a tradition among medal designers). It is believed that approximately 18 Proofs were struck in late 1836 for VIPs. Much has been made of Gobrecht's "arrogance" in signing his die, just as the controversy over "VDB" would mark the Twentieth Century. As long as engravers have been designing coins and medals, they have been working their names or initials into the design. In the Dollar size, these really are *medallic* works of art (much like St. Gaudens' High-Reliefs). Since these Original strikes could well be considered patterns, isn't it possible that Gobrecht never expected his name to go on the production models? Considering how long Gobrecht had worked for this opportunity, who can blame him for wanting to "grandstand" just a little?

The Reverse featured 26 stars in the field, reviving the tradition of using one star for every state in the Union; just to show that being "politically correct" is also a long-standing tradition, Gobrecht used thirteen **large** stars for the Original Colonies, and *smaller* stars for the newer states. The Original specimens all had a plain edge and the die alignment with Peter flying upward towards that great aviary in the sky (see Breen's *Complete Encyclopedia of U.S. and Colonial Coins* for additional details on die alignments). The Original 'name below base' dies were retired to vault storage (to be reused two decades later).

On his "second" working die for the Dollar, Gobrecht moved his name onto the rocky base. Production was authorized by two *separate* warrants issued on Dec. 31, 1836. The first warrant called for just 400 of the Dollars to be minted; this small number is especially significant when *contrasted* with the order for the other denominations - 1,034,200 Halves, 60,000 Quarters, 250,000 Dimes, and 340,000 Half Dimes. The second warrant called for 600 additional Dollars to be produced for delivery to the Bank of the United States (historians will know that things were really hopping at the BUS in 1836!). On March 31, 1837, an additional 600 Dollars went into circulation; these coins were produced at the new "standard weight" of 412.5 grains (vs. the 416 grain standard of the first order). The new order also had plain edges with a different Reverse alignment. After this striking, the dies for this "second" variety were also retired.

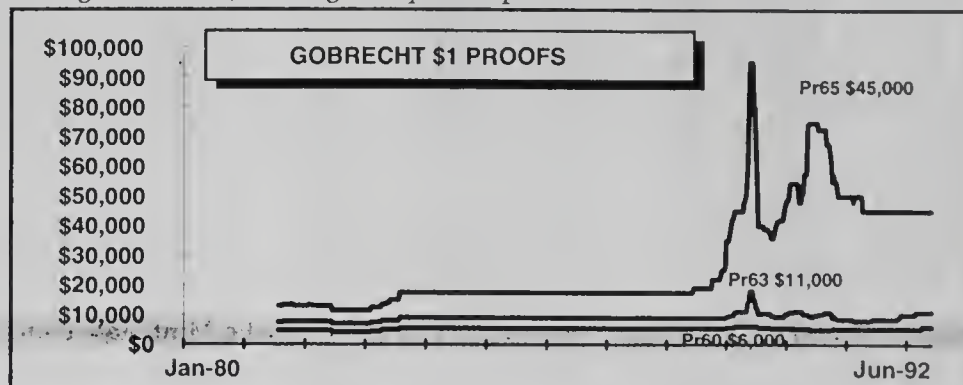

Gobrecht's "third" variety first appeared with 25 Proof Dollars produced on July 5, 1838. The obverse die no longer contained Gobrecht's signature, and thirteen stars were added to the periphery of the obverse field (this brought the Dollar into 'sync' with the other denominations). The stars were removed from the Reverse fields, and the Reverse die alignment matches the Proofs of the very first variety. These dies were retired as well (to be reused about 1858

for making Restrikes featuring a *different* alignment!).

The "fourth" variety appears in the 300 Proofs minted on Dec. 31, 1839 (some of which entered circulation). The die matches that of the 1838 mintage, as does the alignment (both of the Originals and the Restrikes).

The rarity of the Original issues created intense collector demand, motivating Officialdom into resurrecting the dies from the vaults around 1858. After all, what good is demand if you cannot satisfy it? Especially if the Mint visitors seeking Gobrecht Dollars were: 1) VIPs; 2) wishing to trade desired coins for Dollars; or 3) friends. Between 1858 and 1860, all eight Obverse and Reverse dies were located, and a Restrike spree followed. Some of the Restrikes matched the Originals except for weight and/or alignment, while others mixed and matched with abandon. Much has been made of these permutations, and they are of great interest to the specialist. Most collectors will reflect the attitude of the Coiner's Department: "As long as I can own *one*, who really cares?"

The peculiar circumstances of the production of "Gobrecht" Dollars, both in terms of varieties and dispensation, have made this a real topic of contention. Which coins (Originals or Restrikes) were to be considered patterns? Which are to be considered "struck for circulation"? The 1,600 coins dated 1836 with Gobrecht's name on the base are now considered Regular Issues. Breen postulates the 300 delivered in 1839 at the new standard weight as Regular Issues, although they were produced as Proofs.

The rarity of Gobrecht Dollars in Gem Proof becomes immediately evident when their Bidding history is traced, as is the influence of slabbing. Through 1988, the pricing ratios for coins graded Pr60, Pr63, and Pr65 was consistent. The super premiums paid for high-quality/low-pop coins in 1989 and 1990 drove the Pr65 towards the \$100,000 mark. Those levels couldn't be sustained, but the Gem at \$45,000 retains a healthy premium over the Pr63 at \$11,000.

Unpleasant as the topic is, we need to address the "improvements" made by Robert Ball Hughes to Gobrecht's execution of Miss Liberty (though some might argue that it was Hughes who *executed* Miss Liberty). Hughes, an Anglo-American miniaturist (ample warning there), was given the task of "improving" Gobrecht's design. The resulting Liberty is heavier, less shapely, more clothed, and overall more "respectable". At least old Peter was retired instead of abused, as Hughes returned to Reich's shield-breasted eagle for the Reverse.

Mintages of Hughes' No-Motto Dollar (1840-1865) were limited, with few needed in circulation. As described in the earlier articles, the flow of California gold changed the gold:silver ratio, making the silver coins worth more than face. Silver coins were hoarded at best, and melted at worst. Just to show that controversy could follow Miss Liberty throughout, the Dollars produced after the new lower standard (Feb 21, 1853) continued at the old heavier standard. Is the answer to be found in Mint Director Snowden's sale of these at \$1.08 each? Dies were shipped to the Mints at New Orleans and San Francisco; in one of the great numismatic 'discoveries' of this century, nine bags from New Orleans dated 1859-O and 1860-O were found in Treasury vaults in 1962.

Numismatists had long considered the No-Motto and With-Motto varieties to be of about equal rarity. In MS63, Bid was about equal through 1989, when the W/M63 first dipped below the N/M63, and then began to climb above it. During the 1990 peaks, the W/M63 climbed to almost double the N/M63, then drew back to parity, as bidding followed the pop reports more than collector demand. Today, the W/M63 retains a substantial premium at \$3,325 to the N/M63 at \$2,650. The Bidding history of the MS65 over the last decade is similar. Except for a brief period during 1990, the N/M65 and W/M65 have

CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

Gobrecht's Masterpieces In Metal and Liberty Seated Dollars

(continued from previous page)

traded very closely. The W/M65 often held a slight premium, and current Bid is \$22,500 for the W/M65 against \$22,000 for the N/M65.

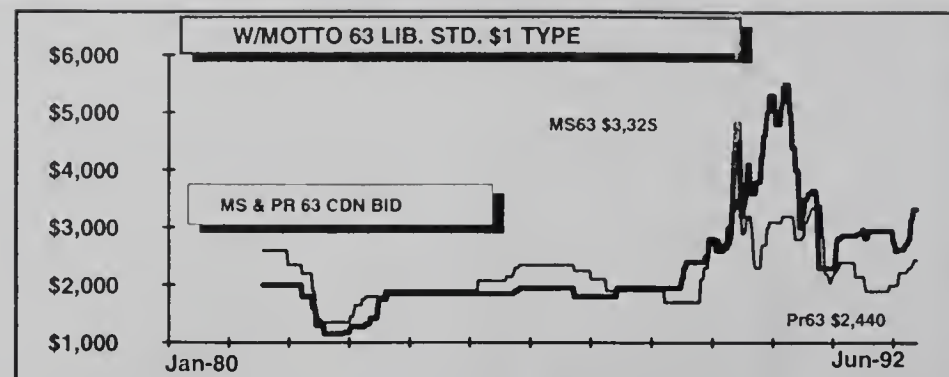

Just as the MS63 N/M and W/M Mint State coins were Bid nearly identically between 1981 and 1989, so were the Proof N/M-Pr63 and W/M-Pr63 (the only difference being that the N/M-Pr63 currently yields the premium). Perhaps a comparison of the N/M Mint State coins to their Proof cousins might be more instructive. Assuming that the bulk of these coins are purchased as type specimens (which also accounts for the similar pricing between N/M and W/M coins), would it also be logical to assume that Mint State and Proof examples should be Bid similarly? Perhaps, but their Bid history shows otherwise. Since 1981, the N/M-Pr63 has usually commanded a decent premium over the N/M-MS63; between 1988 and 1990 the Mint State coins were higher. Prior to certification, prices were probably more influenced by a general attitude that Proof coins were *rarer* and thus, more *valuable* than Mint State specimens; between 1988 and 1990, pricing was greatly influenced by population reports of uncertain exactitude. Today, it is generally conceded that for some issues, more Proofs survive in higher grades than Mint State coins.

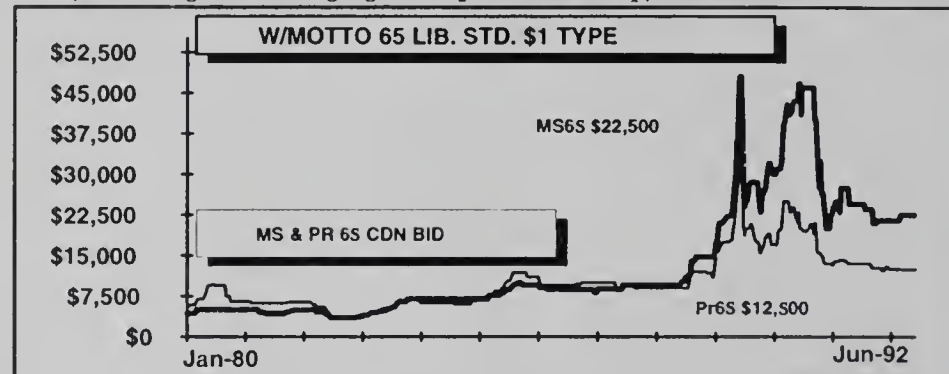

Do we find the same relationship between Proof and Mint State Bid for the N/M65? During the early '80s, N/M-Pr65s usually commanded some premium; after 1988, the N/M-MS65 commanded the premium. The N/M-MS65 currently Bids at \$22,000, almost double the N/M-Pr65 Bid of \$12,500. The current combined PCGS/NGC populations show 33 N/M-MS65s and 68 N/M-Pr65s. Any questions about the effect of the population reports?

Gobrecht's original treatment of the Sully design, after suffering so thoroughly at the hands of Hughes, received much gentler treatment from Longacre. After the Act of March 3, 1865, the Dollar had to bear the motto IN GOD WE TRUST. Minting of With-Motto coins began with the 300 Proof Sets produced during January of 1866. Proofs of the same design and dated as early as 1863 were long thought to be patterns (and probably need to be categorized thus since many were struck in other metals), but were probably struck after 1866 from post dated dies (falling into the same class as the 1804 Dollar). While many of the dates in the With/Motto series are excessively rare, several bags of 1871 and 1872 Philadelphia strikes also came out of Treasury vaults during the Sixties.

During the early '80s, the With-Motto Proof63 Bid held a varying premium over the W/M-MS63; after 1988, the W/M-MS63 Bid higher (substantially higher in 1990). Currently the W/M-MS63 Bids at \$3,325 to the W/M-Pr63 at \$2,440. The ratios for Gems grading 65 follow a similar pattern. The W/M-Pr65 maintained a premium over Mint State through 1988, when their positions reversed. Currently W/M-MS65 Bid at \$22,500 to the W/M-Pr65 at \$12,500. The enormous premiums paid for MS65s during 1990 will be a subject of much discussion in years to come. How many years will pass before the MS65 (N/M or W/M) is again a \$50,000 coin? For most of the 1980s, numismatists considered the No-Motto and With-Motto types to be of about equal rarity and value, and prices were relatively stable. The increased knowledge of certification and population reports (not to ignore the start of electronic trading) was accompanied by increased volatility. Prices doubled and tripled for the MS63 Dollars during the 1989 & 1990 rallies; MS65 Bid increased five-fold (all this against changing conceptions of rarity).

There is probably no greater mystery than the infamous 1870-S Dollars, with no mintage records to account for the dozen or so known to exist. The prooflike quality of higher-grade survivors suggests a specimen striking (a theory consistent with the piece placed in the cornerstone of the San Francisco Mint Building). Perhaps this balances the 700 1873-S Dollars minted and never-to-be-seen again. Anyone looking for an even greater mystery can try to explain the high mintage in 1872, or can spend a lifetime trying to explain the Carson City issues of the Dollar, with all the political intrigue and institutional skulduggery that one can imagine (and numismatists can imagine quite a lot!). The final challenge is to understand the Silver Lobby and its role in history. The Dollar coin was abolished in the Mint Act of Feb. 12, 1873, to be replaced by the Trade Dollar (see the March 1990 Monthly Supplement for more on that coin's tortured history), and the Dollar coin demonetized in June of 1874 (only to be restored by the Act of Feb. 28, 1878). Ultimately, we have "Silver Dick" Bland to thank for one of our very favorite coins, the Morgan Dollar.

Most collectors will content themselves with one example of the No-Motto variety, and one with the IN GOD WE TRUST Motto added; more advanced collectors will want to pursue a "Gobrecht" Dollar. Low mintages, high circulation of the few produced, melting, exportation to Latin America, a bewildering array of Originals & Restrikes, and the discovery of a hoard a century later; this is definitely a series for the specialist. Even with Liberty Seated Dollars, numismatics is never dull.

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1992 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 6,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

CALL TODAY FOR INFORMATION — 310-515-7369

YES, I want to order mailing labels for the 6,000 names from the 1992 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature
My check for \$325 payable to CDN, is enclosed.

☐ First Class; Zip Code Order

☐ Third Class; Pre-sorted Basic Bulk Rate Order

(Please provide City, State and Zip of mailing site for bag tag preparation)

Let's Hear It For the Person Who Counts!

by Q. David Bowers

Editor's Note: The CDN Monthly Supplement periodically dedicates articles for market leaders to share their success factors. Q. David Bowers is one of the most successful coin dealers in America, serving his customers and the numismatic community for more than 35 years. A Past-President of the ANA, a Past-President of the PNG, author of more than 30 books and thousands of articles, Dave attributes his success to "the one person who counts".

Let's hear it for the person who counts in our business - the **collector**! All too often in today's busy market, transactions are accomplished on a dealer-to-dealer basis, with little thought given to the ultimate "consumer" - the **collector**! But you know, without the **collector** there would be no dealer-to-dealer transactions. Professional numismatists exist only as a conduit for transferring a coin from one collection to another. Dealers alone do not make a market.

My firm, Bowers and Merena Galleries, Inc., primarily deals with private **collectors** - private in the sense that they go about their collecting as a hobby, without publicity or fanfare. As I picture our customer in my mind's eye, I see a man (for most **collectors** are men, and I cannot understand why more women are not coin collectors), reasonably successful, in his twenties or thirties (or perhaps even in retirement), who has other interests, but who buys coins for **enjoyment**. I'd also say that my company is unusual, inasmuch as we primarily sell coins to people who enjoy buying them for artistic, romantic and historical purposes - *in addition to* being a store of value. We do not emphasize *investment* on its own, but suggest that the potential for profit exists along with the satisfaction of building a fine collection and holding it for a long period of time.

I have found that other dealers who emphasize investment in their sales presentations are apt to mortgage the future for the sake of a good sale today. A typical "pure" investor - the buyer who acquires coins for investment only and for **no other reason** - is apt to be a very fickle, difficult-to-satisfy individual. First, he seldom knows what he wants or why he is buying it (this is usually seen as an advantage, since recommended coins are always in stock!). Responsive to sales pitches,

the typical investor tends to buy what is touted or recommended, and does little (if any) serious research concerning it. On first acquiring a coin or group of coins, there is temporary satisfaction with their beauty and with the knowledge that they *are supposed to be* a good investment.

However, as there are no other considerations to sustain his interest except for price and price alone, sooner or later he will wonder how his investment is doing. If it has stayed the same or has gone down - and that has happened for much of the market during the past two or three years - he is an "unhappy camper". No longer does he want to buy coins - yours or anyone else's. He complains that coin collecting is "a bad field", he has "been misled", "coins are a poor investment", etc. etc. Furthermore, he complains to his friends that "coins are a bad deal". All of the energy you spent gaining a customer is lost - he is no longer a buyer of coins.

Contrast the investor with the **collector** who buys (to pick a miscellaneous example) an 1873-CC Trade Dollar and studies it, realizing that this is the first year of issue of one of America's most historic coins. He will appreciate that the piece was struck at the Carson City Mint using silver taken from the Comstock Lode (discovered in 1859 and centered in Virginia City, Nevada). And his interest grows. Even a well-worn 1873-CC Trade Dollar has a great deal to recommend it as a collector's item. Indeed, if I had the space here, I could write a few pages about its history and background and still not come close to exhausting the subject.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified) but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGIT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

the COIN DEALER Newsletter

Let's Hear It For The Person Who Counts!

(continued from previous page)

In a word, such a coin can be *fun* to own. When something is fun to own, the enjoyment tends to last for a long time. If, for example, you buy a Currier & Ives print for \$1,000 and hang it on your living room wall, you cherish no illusion that it will be worth \$1,200 a year from now. Instead, you enjoy owning it and displaying it. If you keep it for ten or twenty years, and then sell it for \$2,000, this is fine, and it makes the ownership even more pleasurable. However, in the meantime, you have enjoyed it for other reasons.

It is no secret that the coin market is at a watershed, a turning point. The investment market of the late 1980s, with its highly touted "Wall Street money," is history, and what few investors remain in the market are often bruised and bandaged. The investment market, with all its hype and promotion, and in many instances ridiculous prices, drove many *collectors* from the field, and many have *not* returned. What market strength there is today comes from those *collectors* who opted to stay with numismatics, even though most may be buying lesser grade coins and staying away from "investment quality" pieces (MS65, Proof-65 and higher levels).

Many areas were unaffected by the investment boom, particularly areas in which a great deal of emphasis was not placed upon high grades such as MS-65. Ideal examples are Large Cents and Colonial coins - the market for these has never lost its momentum. These coins in all grades - high and low - sell today for as much or more as they ever did, and the enthusiasm is intense.

To me, it is perfectly obvious that any dealer wanting to have a successful business should emphasize the pleasures of collecting, not the profits of investing. **On our mailing list, there are clients who have been buying coins from me ever since the mid-1950s — over 35 years ago!** Many of these *collectors* are just as enthusiastic now as they were then. Since many coins are expensive, the investment factor cannot be overlooked, of course, but its long-term potential goes along with the formation of a collection - and on its own, pure *investment* has little chance for short-term success.

The easiest way to cultivate *collectors* is to sell books (writing them is somewhat harder, but much more fun!). Helen Carmody of the Society for U.S. Commemorative Coins recently said that my book published last year *Commemorative Coins of the United States: A Complete Encyclopedia*, had on its own created quite a few *collectors* of commemoratives. Another dealer who bought a quantity of these books wrote to say that for every dozen he sold, probably six or seven enthusiastic new customers resulted. I am not trying to sell copies of my book here - for the book has sold very well on its own. However, I am suggesting that any dealer wanting to build his clientele and to develop hundreds or thousands of enthusiastic customers can do so by first "pushing" the sale of interesting reference books. There are many fine publishers, and they grant attractive wholesale discounts. I would speculate that fully half of the members of the Professional Numismatists Guild (the leading American dealers' association) have not each sold a total of \$100 worth of books to their clients during the past year! Such dealers have no one to blame but themselves if their sales and profits are slow.

In addition to whatever financial success you achieve from encouraging new *collectors*, you will also develop a number of new friends. I *enjoy* my customers. It is always a treat when someone takes the time to write me a nice letter, or calls to ask a question about a 1793 large cent, an 1895 Morgan Dollar, a 1787 Fugio cent - or anything else, common or rare. Friends have been called the greatest asset anyone can have. Certainly, here is another reason for developing clients who are *collectors*.

As a professional numismatist, what you do today can directly influence the course of the hobby. Sit and do nothing, and the market will decline, as will the hobby. Take an active part, sell books, give talks at coin club meetings, write articles, encourage an interest in coins among young people, and otherwise get involved - in short, **do your share** - and you will find yourself part of a dynamic hobby that will swell during the 1990s.

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1992 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 6,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Want to take advantage of our discounts for multiple mailings? Contact us for details!

YES, I want to order mailing labels averaging 6,000+ names from the 1992 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature
My check for \$325 payable to CDN, is enclosed.

☐ First Class; Zip Code Order

☐ Third Class; Pre-sorted Basic Bulk Rate Order

(Please provide City, State and Zip of mailing site for bag tag preparation)

MONTHLY SUPPLEMENT *newsletter*

Vol. XVII No. 8

AUGUST 14, 1992

Single copy price: \$3.50

S. R. O. + 2

by Barry Stuppler

"Let's control our own future" was a major theme among dealers at the 1990 ANA Convention in Seattle. The Feds had just closed Hannes Tulving Rare Coins. Their investigation of the Professional Coin Grading Service, although turning up little of substance, received widespread negative press coverage. Speeches by representatives of the government regulatory agencies reinforced the industry's need to 'do something' before the government 'did something' to us. The growing concern of the regulatory agencies sent shock waves through the collector and investor communities, and uncertainty about the future of coin investments helped stifle demand.

Rare coin and bullion industry leaders were shaken by these events. To encourage future growth from both the investor and collector segments of our hobby/industry, a movement arose to identify and fix the problems. Looking to the future, industry leaders decided that the time had come to form our own regulatory agency. Paul Koppenhaver, Executive Director of the Professional Numismatists Guild (PNG), Howard Segermark, President of the Industry Council for Tangible Assets (ICTA) and myself, as Chairman of the Coin and Precious Metal Accreditation Program (CAPDAP), with the help of many other industry leaders, were the vanguard of this movement.

Preliminary organizational meetings, attended by rare coin and bullion industry representatives, were held on both coasts. Lengthy discussions covered the types of regulatory organizations being considered, as well as their structures and funding requirements. As envisioned, the *self-regulatory organization* (SRO) was being formed for a greater purpose than just getting "the government off of our backs." We wanted to organize an effective, industry-wide SRO for three reasons: 1) to insure the future growth of our industry; 2) to protect investors and collectors from unscrupulous individuals; and 3) to have one central regulatory authority, instead of numerous municipal, state and federal agencies.

These preliminary meetings produced many unique and innovative ideas, and as the concept moved forward, a "Summit" meeting was called prior to the October Long Beach Coin Show. More than 150 concerned individuals attended - an enormous gathering by industry standards. Representatives came from the grading services, the

press, the trading networks, convention promoters, trade associations, as well as many dealers. Some of the attendees had prior experience in setting up SROs. The all-day meeting covered an immense agenda, and by the final hours, it became clear that the majority favored the formation of a self-regulatory organization. Differences remained on whether the framework should emulate the Jeweler's Vigilance Committee.

By majority vote, an SRO that would be 'grafted' onto an agency of the Federal government was approved as the best possible solution. A Steering Committee was elected, funded, and asked to find the best way to set up an SRO. Their findings were to be presented at the January 1991 F.U.N. show. The Steering Committee consisted of Chairman Hugh Sconyers, Bernard Rome, Ira Goldberg, Rick Lawson, Michael Haynes, John Albanese, and myself. Our contacts with existing SROs quickly highlighted the most crucial element in the creation of an SRO: *knowing that the SRO could count on the full support of all segments of the hobby/industry.*

It soon became obvious that the industry was *not* united behind the SRO concept. By late November, opposition to the still-unformed SRO was already appearing in print. Among the other charges was that the SRO would sacrifice the interests of collectors in favor of the investors. Other articles mistakenly cast the Steering Committee as elitists who didn't really care about small neighborhood coin dealers.

During these months, values for rare coins and bullion continued to slide. By the Florida United Numismatists show in January, dealers' attention was focused more on short-term survival than on the future of the hobby. When the Steering Committee presented its feasibility study, attendance at the well-publicized meeting was extremely poor. Support for the creation of an SRO was waning, and the Steering Committee disbanded. One final "heroic" effort by Bernie Rome marked the end of the "noble tragedy".

I would like to take the opportunity here to extend my special thanks to the many individuals who volunteered their time, energy and money to the effort to form an SRO. Although it now appears that our efforts were fruitless, believers in this lofty goal still exist. And the efforts yielded something extra-ordinarily good: we now know that our hobby/industry has scores of leaders willing to put the long-term good of the numismatic community over their own personal gain.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (*Greysheet*), both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (*Greysheet*) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

S. R. O. +2

(continued from previous page)

What's Past & What's Next

It has been two years since that enthusiastic first meeting. What else has happened during that interval? Dealers are only too aware that the rare coin market has continued to decline. The number of dealers in precious metals and rare coins has dropped. The number of investors continues to slide. No new Wall Street firms have established rare coin limited partnerships, or built rare coin trading departments. And more money laundering and 'broker' reporting regulations have been placed on dealers by the government. ICTA, the only representation we have had in Washington, is fighting for its survival. Government Regulatory agencies have continued to make headlines and produce "bad-press" for collectibles, while making little progress in getting to the root of the problem — shutting down 'boiler rooms'. Two boiler room operations (whether peddling rare coins, stamps, gold-painted bricks, or swamp-land in Florida) seem to pop-up for every *one* put out of business. As long as the government continues to focus on the product, instead of the "boiler room" operation itself, negative headlines about rare coins will continue to come out of Washington.

I remain convinced that it is unfortunate that we failed to develop an SRO for the numismatic hobby/industry. Such an organization would have opened the door to institutional investment in rare coins. It would have provided increased levels of comfort and protection for collectors. In short, our hobby would have expanded during the past two years, instead of contracting. But I don't want to be one of the numismatic naysayers that chip away at our livelihood with their words. I see many rays of hope amidst the clouds. The American Numismatic Association, with the help of the PNG, developed a news campaign focusing on the missing 1894-S Barber Dimes. The ANA is developing a daily radio program promoting the collecting of coins and currency. Many other dealers are involved locally in efforts to get the public interested in coin collecting. I applaud these efforts, and encourage all CDN readers to offer support in every way possible.

The future of commercial numismatics is uncertain. We may revert to a hobby, servicing only collectors as we

did during the 1940s and 1950s. Or, we can expand our business by placing rare coins with collectors *and* investors, as we did during the 1960s, 1970s and 1980s. But one thing is clear to me: to return numismatics to its former state of vigor, we must unite in an aggressive effort to deliver three messages to the public.

- 1) They must be told of the personal rewards from coin collecting and investing.
- 2) They must become aware of our continuing cooperation with law-enforcement agencies to remove the 'bad apples' from this industry.
- 3) They must be convinced, through our actions on the first two points, that full-time, professional coin dealers will adhere to high standards of professional conduct.

All members of the numismatic community will share in the rewards of a healthy market that enables us all to prosper. If the SRO was too grandiose an undertaking in 1990, perhaps a smaller, more-defined target can be achieved in 1992. However, we must make the effort to continue moving our hobby/industry forward, or surely it will continue to move backwards. The harsh economic conditions of the past few years have been a lesson for those who seek to keep the coin industry a hobby for the privileged few. For my part, I would welcome the revitalization of our industry through the infusion of new collectors and investors. And just as surely, as the coin market improves, we will again be flooded with 'Johnny-come-lately' promoters and 'boiler-room' outfits trying to fleece the unsuspecting public.

Before that happens again, I urge the leaders of our industry to renew their efforts to form a strong self-regulatory organization to protect the public and provide clear guidelines for ethical practices. The goals of all numismatists can be fulfilled if the ANA, PNG, ICTA and others unite in this effort.

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1992 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 6,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Want to take advantage of our discounts for multiple mailings? Contact us for details!

YES, I want to order mailing labels averaging 6,000+ names from the 1992 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature
My check for \$325 payable to CDN, is enclosed.

☐ First Class; Zip Code Order

☐ Third Class; Pre-sorted Basic Bulk Rate Order

(Please provide City, State and Zip of mailing site for bag tag preparation)

the COIN DEALER

MONTHLY SUPPLEMENT *newsletter*

Vol. XVII No. 9

September 11, 1992

Single copy price: \$3.50

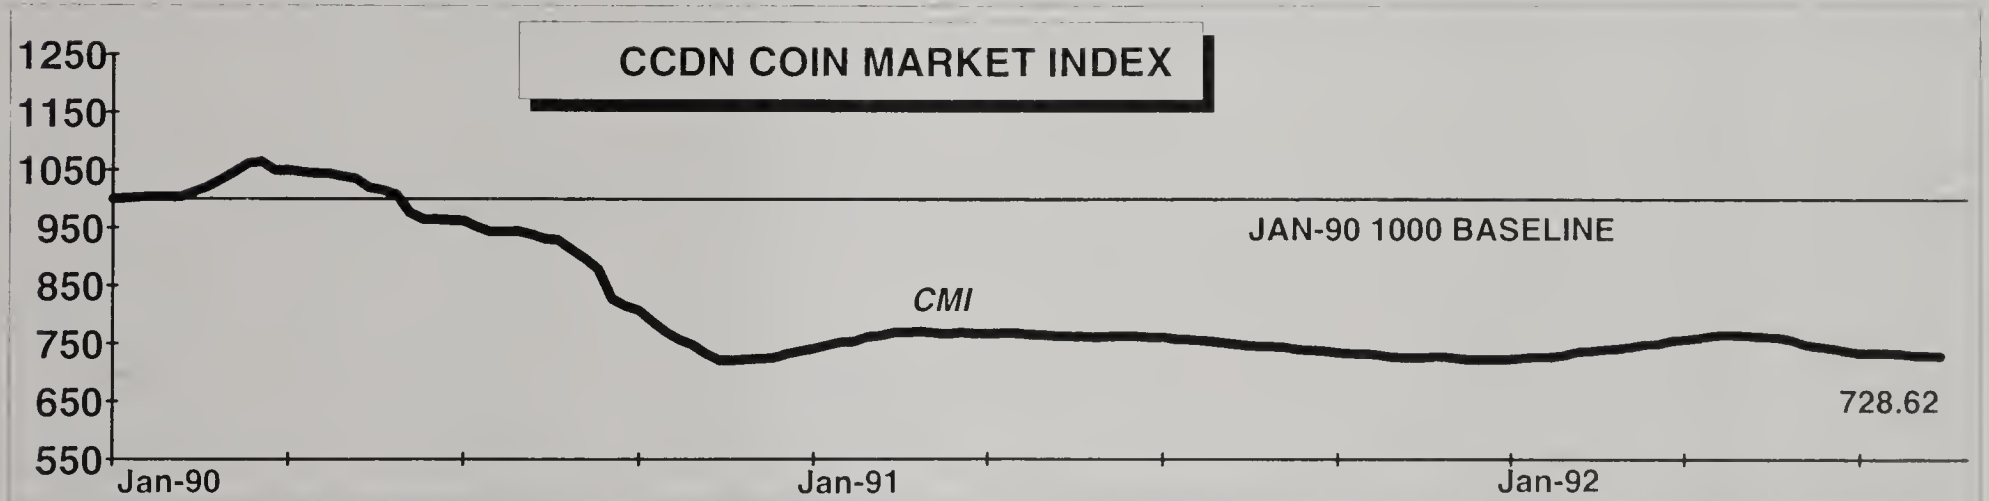

Using Plus & Minus Signs To Predict Market Direction? It All Adds Up!

The *Coin Dealer Newsletter* has been publishing plus and minus signs on its charts since 1963, and for nearly three decades, numismatists have been relying on them for quick evaluations of the market. "Lots" of plus signs, and the market is obviously rising; "lots" of minus signs, and the market is in trouble. Of course, dealers then and now know that counting plus or minus signs only gives a rough fix on a market that is constantly in motion. The argument *against* relying too heavily on such a raw count has one **strong** point - you simply don't know whether any given plus (or minus) sign represents a change of \$1 or \$10,000. That

considered, you don't need to waste too much time considering other arguments against over-emphasis.

Several years ago, readers of the *Certified Coin Dealer newsletter* (the "*Bluesheet*") put in repeated requests for counts of the weekly plus and minus signs. We complied for a short period, but we found that the frequent small changes in generic values were producing unreasonably large counts of changes. One-Dollar drops in generic prices for Morgan dollars could produce hundreds of minus signs, and we felt that it would have been *misleading* to have readers judging the entire market on this basis (especially when, the following week, the same coins might be displaying hundreds of plus signs).

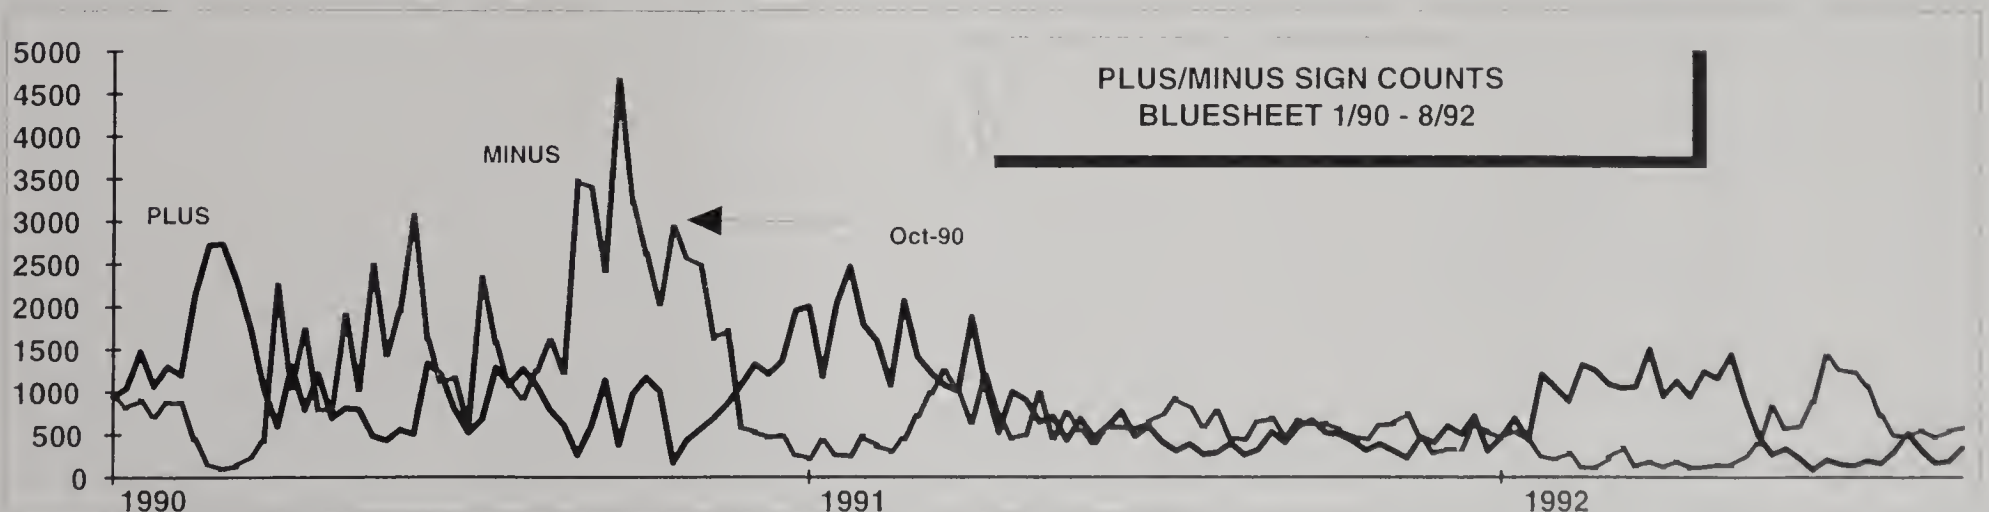

Rather than report the weekly Plus/Minus counts, we created the *CCDN Coin Market Index* ("*CMI*"), a weekly feature comparing the current Bid on every coin in the *Bluesheet* with its value on January 5, 1990 (the *CMI* was set to 1000 for the starting issue). By using every *Bluesheet* coin in its comparisons, the *CMI* utilizes information on over 10,000 issues. The composite results are graphed weekly, with a numerical breakdown of the individual charts.

A quick examination of the chart tells numismatists what they should already know: coin Bids are down *substantially* from their levels in January 1990. Overall, the market is down more than 25%; some charts are down substantially more, while others have fared better. The *CMI* also clearly shows the small rallies during the early months of 1990, 1991, and 1992. Due to its broad base, and its use of real values *instead of*

movements of uncertain size, the *CMI* is a very efficient indicator of market position.

While we don't publish the weekly counts of *Bluesheet* Plus/Minus signs, we continue to keep that information, and now would like to share some observations. We know that dealers use the raw counts as predictors of future market direction, as well as for current market status.

Comparing the raw count of plus and minus signs, two conclusions seem obvious. First, during an up market, you have lots of plus signs, and few minus signs; during a down market, the opposite holds true. The 'plus' peaks of early '90, '91, & '92 are all visible here, as are the subsequent declines. Most interesting are the points at which the Plus and Minus Lines cross; they would seem to be the moment of certainty that the market has changed direction.

Secondly, the graph indicates that the overall volatility of the market is lower now. We would avoid making too much of this point, however, because it is a reflection of a deliberate decision by the *Bluesheet* staff in October of 1990 to change the method of reporting Bidding Declines (this was reported in the October 19 issue). Simply put minor changes and Bidder successes in purchasing no longer triggered a slew of minus signs.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

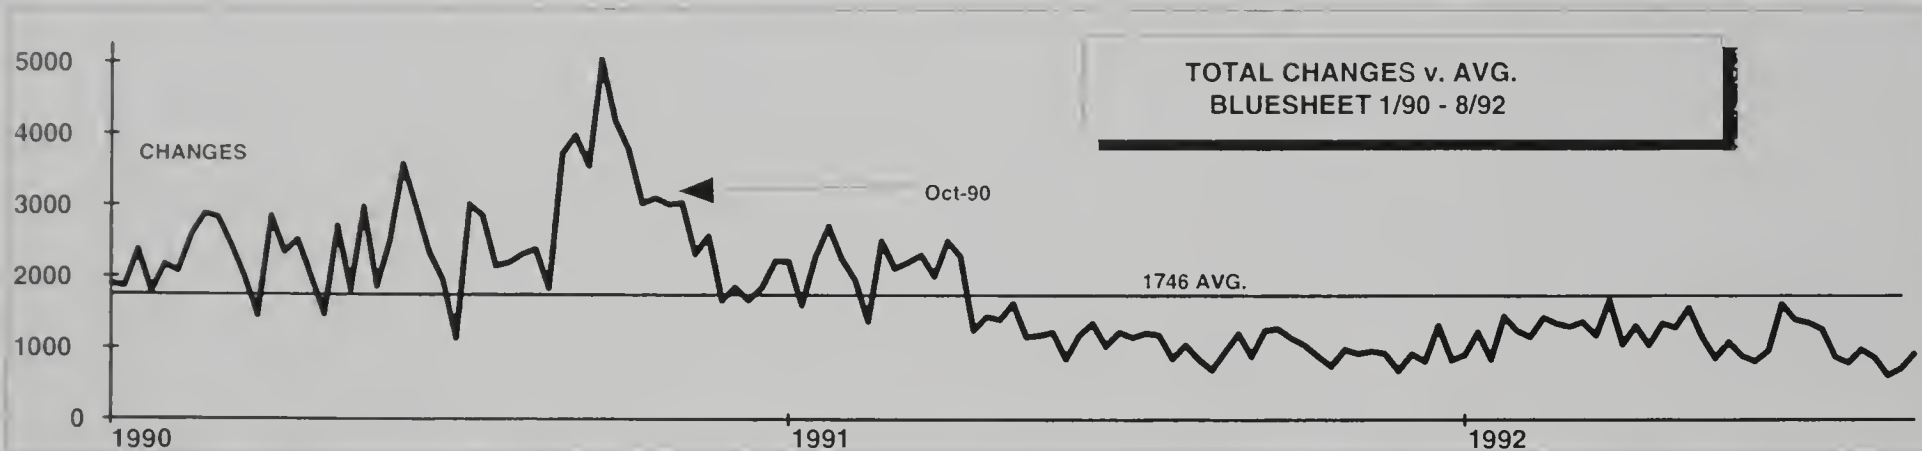

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

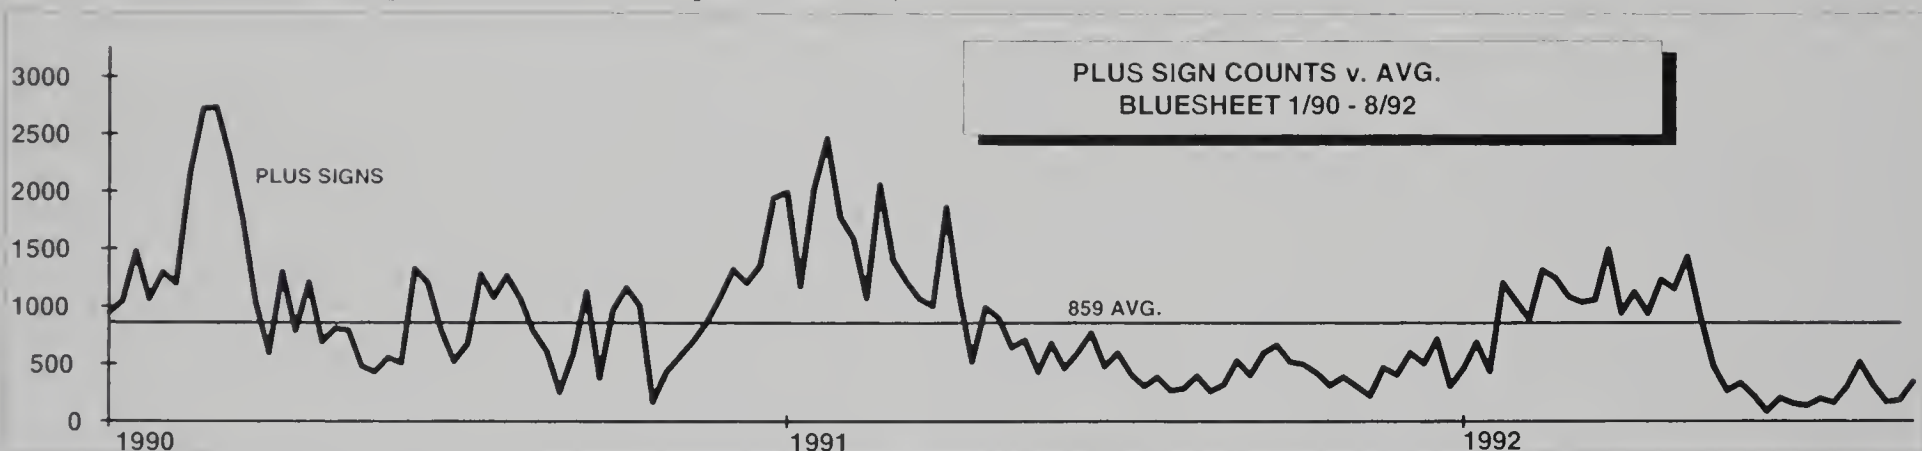

Address all subscription remittances to:

the COIN DEALER Newsletter

Totalling the number of all changes in Bluesheet prices (sum of all Plus and all Minus signs) produces a slightly different index of market volatility. The period of greatest volatility (the second and third quarters of 1990) are

also the time when the CMI showed the greatest decline; knowing that the largest component of the total was minus signs provides the direction.

The graph isolating the raw counts of Plus signs, compared against the average count of 859 (over the period Jan 90 - Aug 1992) clearly shows the late winter rallies of '90, '91, & '92. Logically, an "above average" count of Plus signs is a sign of a rising market, just as periods of "below average" evidence down markets. Beyond this simplistic observation, the graph also suggests some very interesting volatility (evidenced in the distinct peaks and

valleys). Their significance is uncertain (our senior staff, with more than a century of numismatic experience, cannot agree on a reasonable explanation for this ratcheting), although it suggests that Bidding increases occur with peaks of interest rather than following a steady path. Since January of 1990, the twelve weekly charts printed in the Bluesheet have enjoyed a total of 117,742 plus signs (averaging 859 per issue).

The raw Minus sign count suggests very different questions. While the late Winter rally dips are visible, more impressive are the enormous counts in Autumn of '90. With an average count of 887 Minus signs per issue (from a total of 121,495), peaks approaching 5,000 are certainly a danger signal for the coin market. Of course, these Minus signs correspond to the CMI decline during April-Sept. of '90. Following our policy change in Oct. of '90, the market certainly appears less volatile; however, the CMI equally shows the latter volatility. Whether you are following the Minus signs on the charts or the real dollar declines of the CMI, a massive market liquidation is going to show up! Like the Plus sign graph, this Minus chart shows a progression of peaks and valleys. In our Bluesheet editorials, we have many times referred to the concept of the "waves of liquidation" that have been driving coin prices lower. Normally we think of these as longer term events, but the peaks of

raw minus counts strongly suggests that "waves" are an apt metaphor, and that this might be a short-term occurrence as well as a longer-term trend.

In summary, while Plus and Minus signs have the obvious limitation of hiding the degree of change, they remain an effective way of getting a quick fix on the weekly market. The crossover points of Plus and Minus raw counts are a strong indicator of market reversal, and the charts illustrate some of the longer term trends as well. However, with the raw count of Minus signs standing only 3.2% higher than the raw count of Plus signs, they provide no clear indication of the severity of the market's decline since January of 1990; would that it had only declined 3.2%! The CMI provides a more detailed way of looking at these market changes over time, as well as providing more specifics on the individual charts. However, Plus signs are still the easiest and quickest way to convey in a glance that MS64 Morgans are up this week.

Cameo and Brilliant Proof Coinage of the 1950 to 1970 Era

by Rick Tomaska

a comprehensive book with
over 400 color photographs,
a detailed date by date
analysis and much more!

"A LANDMARK BOOK!... At PCGS, Rick helped us formulate the standards for our new "CAMEO" and "DEEP CAMEO" designations for 1950 to 1970 proof coinage.... I highly recommend this book to anyone interested in modern cameo proof coinage." **DAVID HALL, Chairman of PCGS**

Hard-cover now available at \$35.95 plus \$3 shipping

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1992 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 6,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

MONTHLY SUPPLEMENT *newsletter*

Vol. XVII No. 10

October 9, 1992

Single copy price: \$3.50

"It Was the Best of Times, It Was the Worst of Times"

It was the off-hand remark of a dealer-friend, issued after much contemplation and two Long Beach Brew & Buns, that inspired this article. "You know, *prices were higher ten years ago*", he insisted. Everyone in the coin market, dealer and collector alike, knows that coins have fared poorly over the last several years after booming in 1988 & 1989. Coming off those unsupportable highs, dealers expected prices to stabilize at the more reasonable levels reached in 1990; instead, many issues met with further declines. The *Certified Coin Dealer Newsletter Coin Market Index*, which examines *Bluesheet* Bid prices on over 10,000 coins every week, started in January of 1990 at 1000 points, and is now hovering around the 720 mark. It has been a tough time for dealers, especially in an inventory-based business.

Still, dismissing an entire decade sounded rather overly-pessimistic to me. Old-timers in numismatics know that the pain is never distributed equally across the market, or even across the coins of a particular series. While some show *pain*, others will *gain*. Supply and demand are not required to act uniformly on all coins. I proposed a few issues that were much higher than a decade ago, but of course, he countered with some real losers. Another Brew & Bun failed to resolve the disagreement. It seemed that the only fair settlement would require *the facts*. And like all such discussions, *the facts* ultimately supported the assertion that the last ten years in the coin market have indeed been the Best of Times and the Worst of Times.

We append herewith a list of some of the biggest *Leaders* and *Laggards* since October of 1982, with only a few caveats. We avoided Bids on coins that are non-existent (that is, non-certified); however, the *averages* reported below (especially on 65 coins), will include some speculative Bids on zero pop coins. We ignored some repetitions (such as in generic and low-circ Morgans). We made no adjustments for inflation or changing grading standards. Lastly, since we have greatly expanded *CDN* coverage since 1982, it wasn't possible to compare all currently-listed coins. "Pop" figures are combined PCGS and NGC population reports. All percentages are direct comparisons of the Bids - a coin with the same Bid now would show 100%; a coin that doubled would show 200%; a coin that declined 25% would show 75%.

At first glance, one might be tempted to think that MS60 Gold did particularly poorly, with so many nominees on the Laggard chart. Actually, across the chart, MS60 fared well. Comparing all possible pairs, the average coin on the Mint Gold chart increased 46% (to 146% of 1982 Bid) during the intervening decade. The average VF Gold Type coin is now at 84% of its 1982 price; XF at 84%; AU at 91%; MS60 at 106%; MS63 at 214%; and MS65 at 299%.

The average Silver Commemorative increased 45% (to 145%), with the individual grades turning in these average performances: XF/AU at 149%; MS60 at 100%; MS63 at 99%; and MS65 at 231%. The unanimous showing of MS65 graded coins in the Leaders' charts is not a coincidence. This effect is probably a result of changing grading standards; PCGS or NGC is likely not to

agree with your 1982 flip with the MS65 grade on it. Higher quality coins yield higher prices; no surprises there!

The average Gold Commemorative increased 36% (to 136%), with the individual grades turning in these performances: XF/AU

at 125%; MS60 at 75%; MS63 at 102%; MS65 at 242%. The strong showing of MS65 graded coins on the Leaders' charts is likewise not a coincidence; the population reports of the certification services demonstrate the rarity of many MS65 Commemorative issues.

The Morgan Dollar comparison provides little good news, as any small coin shop carrying a variety of dates in lower grades has known for some time now. First, from our Laggard chart, we have ignored the drops on hundreds of coins due to decreasing bullion value of the circ issues, as well as drops on generic Mint State specimens. For example, the 1921 Morgan in VG dropped from \$12.25 to \$5.20; you could fill quite a few charts with these. Even though the average change between

1982 and 1992 was up 94% (to 194%), that number is boosted considerably by the average MS63 DMPL comparison of 341% and the average MS65 DMPL comparison of 658% (many of which are speculative Bids on zero pop coins!); without those two numbers, the average VG-MS65 is 118%. Note that *CDN* has always listed prices for DMPLs, and that comparisons were based on the range bottom. The individual grades break down as follows: VG at 69%; F at 71%; VF at 69%; XF at 71%;

AU at 82%; MS60 at 82%; MS63 at 142%; MS65 at 356%. Long term in Morgan dollars, MS65 quality still paid (unless you were buying generic dates or trying to buy zero pop dates!).

As dismal as the Morgan picture was, the Peace Dollar comparison provides even less good news. From our Laggard chart we again ignored repetitions drops

EXECUTIVE DIRECTOR—Pauline Miladin PUBLISHER—Ron Downing
EDITOR—Dennis R. Baker ANALYST—Robert Korver
CONSULTING EDITOR—Edward Judd GRAPHICS—Shane Downing
CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

the COIN DEALER Newsletter

on lower-grades and generics; the drop in bullion prices has very little to do with the rare coin market (unless you happen to have a few thousand of these in stock, of course!). Even though the average dropped only 10% (to 90%) between 1982 and 1992, that number is boosted considerably by the average MS65 comparison of 268%; without this number, the average VG-MS63 sinks to 64%. The individual grades break down as follows: VG at 56%; F at 60%; VF at 64%; XF at 68%; AU at 77%; MS60 at 56%; MS63 at 69%; MS65 at 268%. Long-term in Peace Dollars as well, the discerning eye assembling a date-set profited handsomely.

If you noticed that the list of Proof Set leaders is a bit short, you're right. And remember, this is perhaps the most common way for new collectors to get introduced to the concept of buying quality coins. If anyone wants the bad news (for the sets that we were able to compare), the current average price is 77% of the 1982 price. Just remember who the original seller was.

Mint State Type turned in a strong performance over the decade, as Bids rose to an average 150%; of course, that average consists of only two comparisons: 63 Grade, turned in a 98% performance; MS65, 201% We have broken out the Copper Mint Type Laggards in a separate chart, while the 1982 Greysheet did not specify color on copper pieces, such as the 1955 Flat, which is assumed to have been for proof sets. Proof sets are a specialty of the coin shop.

Over the decade, the average listed Bid for Circulated Type rose 16% (to 116%), with the individual grade averages as follows: G at 112%; VG at 125%; F at 132%; VF at 119%; XF at 117%; AU at 117%. Mint State 60 specimens are now included on this chart in the Greysheet, and they averaged 92% - although none were included as either Laggards or Leaders.

For our final comparison, we'll look at how Proof Type coins have done over the decade. On average, Proof Bid has increased 18% over the decade (to 118%). Proof60 coins have averaged a 5% decline (to 95%), Proof63 a 1% decline (to 99%), while Proof65 climbed 61% (to 161%). Quality definitely paid in Proof Type. Lastly, a quick look at that other staple of coin shop sales - U.S. Mint Sets - shows the same profit and loss opportunities.

As you can plainly see, the last decade in the coin market has clearly been the Best of Times and the Worst of Times. Over the decade, there have been several up & down cycles; nothing beats "buying low" and "selling high". Coins graded 65 did very well on average; considering how hard these same coins have been hit since 1989, imagine how well you could have done by timing your sells. Pick your coins with a sharp eye and lots of luck, and you did just fine. Buy the wrong coins, and you saw your inventory plummet in value. As a dealer, there is no substitute for knowing your customers, and knowing their preferences; buy what you know you can sell, and buy at a price to maximize your chances of earning a sufficient profit to stay in business. If it were as simple as "buy 65s" or "buy 63s", we could all retire next year. Since an "investment" in rare coins is definitely not guaranteed to turn a profit, you need to educate your customers to enjoy their hobby for what it is. They need to buy coins that they will enjoy owning, you need to buy coins that they will want to own. After all, the whole idea is to buy coins that will end up in their collections, not in your inventory.

And They Call This A Coin Shop?

It will come as no surprise that the current Recession has hurt many coin dealers. Making ends meet can be pretty difficult when coin prices have been declining over the past several years. Declining inventory values can be very depressing, especially when you factor in overhead and the time value of money. Dealers, being a resourceful lot, have come up with many different alternatives to get through these difficult times, so we called some in California (as well as a few across the nation) to survey their strategies. Some who were facing difficulties expanding their client base and/or their expenditures were considering changing their current method of doing business. Oh, we should also point out that there are *many* dealers across America who are earning respectable profits in the coin trade, even in this slow market.

Open a Shop?

One of the tactics we see being employed is finding new channels for sales. Julian Leidman, who remains a 'fixture' on the national show and auction circuit, also opened a retail coin shop last year. According to Julian, "I relocated the store of a retiring colleague (where I had kept my office for many years), to reach out to the many collectors in the metropolitan D.C. area, and to make sure that they had a shop to serve them. While I have always stressed retail selling, my very active travel schedule often prevented me from directly serving local 'Saturday morning shoppers'. A shop provides the opportunity to expose the general public to numismatics, and I really enjoy meeting new customers. I look forward to bringing them along in their collecting and numismatic expertise."

Leroy Lenhart, another dealer who recently opened a retail coin shop in Covina, California, expressed many of the same feelings. "Opening a retail shop of my own has been quite a switch for me, after decades of experience in wholesaling and retail mail order. As much as I enjoy my continuing mail order business, having a shop means buying opportunities come over the counter, and I get to spend a little more time just chatting with the customers. Having the customer able to examine the material over the counter, make an informed buying decision, and take the coin with him is worlds apart from trying to describe a coin over the telephone, wrapping it, trips to the Post Office, etc. etc. This is getting back to the basics of coin collecting, where I started. I actually have teenage customers coming in - and I can spend time with them. And it sure is nice to reduce my travel schedule." To encourage customer traffic, Leroy also offers sports cards, autographs, and other antiques.

Join the Big Top?

Some dealers are finding other channels through which they can sell their coins and paper money. Bill Causey of Upland, California, has been finding great success by setting up his booth at County Fairs throughout California for more than 20 years. Last year Bill did eight county fairs, and next year may be doing as many as 15! Bill really has a portable coin shop, taking upright display cases, safes, and other necessities on a custom rig — even a rug; this is not what you will find at a flea market! Bill still attends Long Beach, the ANA, and a few other shows, but he goes to buy: "Circulated Fractional Currency, errors, nice-looking circ U.S. Coins, and \$500 and \$1,000 bills — I can sell every one of those I can get my hands on!" According to Causey, "I can charge full retail for my merchandise, and my customers are thrilled that they are getting such neat pieces of history at such reasonable prices! And instead of agonizing over their purchase decisions, they are just as likely to say 'Give me a dozen of those!' as not. Sometimes I think that coin collectors forget how much fun they had when they first started in this hobby, but the people that I see at every Fair remind me! All day long — and those are 15 hour days — I have people come up and say 'You really have a neat display'. They are seeing many of these things for the first time; they like what they see, and then they buy; and you know, I see many customers coming back year after year,

too. I do this with just one thing in mind — to make money by giving real value to the customer."

While we haven't been able to identify any "coin dealers" who make their living entirely from flea markets and swap meets, we know that a good many coins and pieces of paper money get sold this way. In Southern California, there are many 'permanent' flea markets taking place every weekend. Coins can usually be found at these, and again you find top dollar being paid for merchandise. Fractional currency seems to be especially popular, and why not? Where else do you get an item more than a century old, with the Civil War connection, and one that makes a neat conversation piece to show your neighbor?

Are Stamps a Sales Prop?

Many coin dealers with retail shops are expanding their offerings beyond just coins. In the 'good old days', it wasn't unusual to have combined coin and stamp shops, and these still exist. However, in the last few decades, the specialized knowledge required for success in either of these areas has made it difficult to pursue both avenues. It is still common, however, to find a smattering of stamps and philatelic supplies in coin shops. While few dealers seem to be expanding into philately, the ones who have years of experience selling stamps seem pleased with their decision to remain 'Coin & Stamp Shops'.

Bob van Bebber, whose Rare Coin Gallery of Glendale sits on main street, does a respectable percentage of his business in stamps. "Stamps still have the advantage of providing the young collector (or one on a limited budget) the opportunity to buy a really exciting piece of history at an inexpensive price. Certainly the thrill of chasing expensive rarities is possible in philately, but it isn't *necessary* to enjoying the hobby." Bob also has been expanding his sales of antique watches, an area that he got into just because they are *interesting*. "Watches have the advantage of being 'portable' antiques. You can easily display them, or take your 'antiques' travelling with you. That's something you cannot do with a Louis XIV settee. Plus, they are working mechanical devices — they just don't sit there like coins!"

Coin dealers who are expanding their 'product line' often turn to jewelry; over the years, any dealer with a shop seems to end up buying and selling some jewelry. What started as a way to earn a few extra bucks has become a high-margin area capable of generating needed profits. Sam Lopresto, the impresario of the Long Beach Coin Show, tried to keep Zaidman & Lopresto (his coin business) healthy while devoting enormous amounts of time to the smooth running of what has become an institution. According to Long Beach Show Manager Teresa Darling, "Jewelry and watches always played an important part of our retail trade, both buying and selling. During slow times in the coin market (when the show took up more time than ever), jewelry really helped keep the customers coming in!"

A few others have expanded into these related areas in 'big ways'. Leon Hendrickson does a sizable business in silver bars. A few dealers have even made the transition from coin dealer to jewelry dealer. Jan Bronson, who was a significant player in world coins (and still dabbles in coins), has enjoyed his success buying high-line watches from the numismatic trade. What started as a hobby in the late '70s (as watches were crossing the counter during the great 'melt-down'), became something 'to dabble in' while doing coins, and grew into a business. By 1984, Jan was doing watches full-time, building what is now an international trading network, making a Bid & Ask market on many watches. According to Jan, "Watches are now 90% of my business, with only a few coin transactions (although I am financing some younger dealers). I'm having fun and making more money with one assistant than I did when I had 68 employees. And I'm trading watches today like I was trading coins 20 years ago. I enjoy the watches — they don't suffer from major speculative binges, my customers get to wear and use their purchases, and I work the hours that I want. No, I don't expect to become a major player in coins again. Thank you."

Because all coin dealers are selling pieces of history, it is only natural that you will find other pieces of history in their shops. Tom Werner's shop, on the Courthouse Square in West Chester, Pa., usually has some old Lionel Trains or interesting-looking documents on display in the front window. Roger Bryan's involvement with Lionel Trains is well known in addition to his work with Florida United Numismatists.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

Flog a Short Stop?

More common has been the addition of baseball cards to the product mix, and in many cases the conversion of the coin shop into a sports card shop. Tom Noe opened his Sports Gallery in Ohio, in 1983, well before the 'card craze' went supersonic. Tom started in cards as a hobby, but soon realized that the card market had similarities to the coin market of the last two decades. According to Tom, "I felt when the coin market peaked in the early '80s that Sports Cards were cheap; the same year I sold a *quarter* for \$12,000, I could buy a Mickey Mantle for \$600. I had collected through the '70s, using my coin dealer skills. I made good money with the best old cards. But I made superb money with new cards — I selected the most promising current rookies, and bought in quantity — 100s at a time. Gaylord Perry & Catfish Hunter were the only ones I missed. I paid fifty cents for Brett rookies and later sold them for \$40. I started in mail order in 1981 with my partner Kevin Savage, and opened the shop soon thereafter." Any dealers thinking of getting into cards for the first time might heed these words of advice from Tom: "Modern cards are the Proof Sets of the Sports Card business, but I still see long-term growth for the better material."

Randy Pollock, a coin wholesaler for twenty years, could be found at the last Long Beach Show with a table set up on the Sports Card side of the show. His Sporteert company was started in the Autumn of 1991, after the modern cards had already started to self-destruct; he decided to emphasize Sports Memorabilia, especially autographed material, on the suggestion of a friend with inventory to share. Randy's movement from coins to cards is based on some telling logic: "The typical weekend coin show costs \$1,000, with travel and table costs rising constantly. With the razor-thin margins in coin wholesaling, I would have to sell \$20,-\$30,000 before I started to make any profits. With the lower table costs in Sports shows, and the higher margins in Sports Memorabilia, you can start making profit after \$2,000 in sales. I am currently doing 2-3 shows per month; would you rather start making profits after \$6,000 in sales or \$75,000 in sales? Combined with my mail-order sales, this business is definitely more fun than today's coin market."

Frank Draskovic, who opened his retail shop in 1988 after 25 years selling World Coins, has found a lot of professional satisfaction with his expansion into Medals, Orders & Decorations. "I still love coins — no question about that. But there is something special about orders & decorations that you don't often get with coins. I deal with the artifacts of war heroes, diplomats, military campaigns — the stuff of ambassadors and Kings. With medals and decorations, you don't have to imagine whose hands it may have passed through — in many cases, you know exactly whose hands, and why that person was so honored. In addition to being a rewarding and enriching experience, it may just be the last numismatic frontier for research and enjoyment. What specialist in the coins of the Netherlands can resist an Order of Orange-Nassau — and at less than \$100?" Frank has also been selling antique maps since 1977 for many of the same reasons. "What collector of the French coinage of Napoleon can resist a contemporary map of Europe showing his conquests? Maps can be framed and enjoyed everyday, something that rare coins just don't lend themselves to."

Just to prove the point that these affiliated areas of antiques are capable of generating enormous business, one only has to look at the auction schedule of Superior Galleries. Their Spring 1992 Stamp Auction realized \$1.1 million. Their July 1992 auction of Sports Memorabilia realized \$2.5 million. Their May 1992 auction of Autographs, Manuscripts and Books realized \$1.5 million. Their just concluded sale of the William Arbeiter Collection of Art Glass, held in conjunction with Lyn Knight, realized about \$1.4 million, and in December they have another sale of Art and Antiques, featuring gold pocket watches and porcelain. Their November sale of the Mel Blanc Collection marks their first foray into selling Animation Art, and the same month will be their first auction of Rock Memorabilia and Pop Culture.

Sell A Lamp Top?

Lyn Knight of Kansas did his first deal in antiques in 1970, but was no stranger to them — there are definite advantages to growing up with antiques. In the late '70s, Lyn began to think seriously about the need to diversify beyond coins, and now has a thriving business. Often dealers with retail shops will have a handful of antiques on display, although they are not making a serious effort to become 'antique' dealers. Anyone who loves coins should understand the attraction of historical artifacts. It is not a coincidence that the most unusual paperweight in the offices of the Coin Dealer Newsletter is a cannon ball from the shop of James H. Cohen & Sons in New Orleans. Steve Cohen says "New Orleans is a 'visitor' city, and the majority of our business comes from visitor traffic. They buy lots of coins, but what brings them into the shop are the many other things we sell, especially antique weapons — swords, muskets, pistols. Our large antique iron keys are very popular. And of course, we have the thousands of cannon balls that came out of the Mississippi near Vicksburg. Jewelry, new and estate, has also been a good seller over the years. Our shop looks more like a museum, and that encourages the customers to come in and browse — with the added advantage that nearly everything is for sale (we won't sell Grandad's portrait)." Not a typical coin shop, to be sure, but it is also not a coincidence that the fourth generation is now selling coins and artifacts out of the same building. That is a record of success that few dealers even dream about.

Do a Flip Flop?

Other dealers have turned hobbies into business opportunities. Gary Sturtridge has his slot machines. Bruce Lorch has begun handling rare books. John Maben is enjoying his comic books. Bruce Amspacher has been selling Hummels for 14 years, and has a growing business in custom knives (made for collectors, many with engraved handles or exotic materials, and featuring meticulous construction). Kurt Krueger has wonderful catalogues filled with old documents and American collectibles (political items, tokens, badges, ribbons, medals, etc.), as well as his coin shows. Ed Kuszmar's 'collectibles' shows are growing in popularity. Other dealers are handling everything from guns to gravy ladles. Perhaps it is only natural that some coin dealers will find their sidelines so fascinating or profitable that they will pretty much leave coins behind. Others will focus on their core business.

Anyone who knows Q. David Bowers knows that the "D" in QDB could just as easily stand for "Diversified". David's books cover his wide-ranging interests, but when it came to 'diversifying' Bowers & Merena, David decided to stress the numismatic books that he has always sold. "Our numismatic book division is a profit-center, but high-profits are not the primary reason for selling them. Numismatic scholarship is at the heart of this hobby, and we feel that our best customer is our most educated one. We want our customers to know about coins, and we ensure that through our catalogues and book sales. Besides, since one of my hobbies is writing books, I obviously feel that this is an important way to make a lasting contribution to the hobby."

During these difficult economic times, many dealers are trying something different or something new. We are *not* recommending that dealers get out of the coin business, or even devote half of their shop to Sports Cards or Pocket Watches. We are merely informing you what some dealers are doing; these strategies work for them and the customer base that they have built over the years. We will close by mentioning that Stack's, one of America's oldest and most respected numismatic houses, originally sold stamps *and* coins. During the Depression, when economic times were a lot tougher than they are today, money for collectibles was really scarce. In 1934, Stack's made the decision to specialize in coins; this was a deliberate decision to focus their resources of time, talent and money in order to become a premiere house in the hobby. But even during those difficult years, Stack's served their customers by buying scrap gold — *including gold teeth!* Keep the vision, but don't be afraid to do what has to be done to get through the hard times.

A COLLECTOR LURKS INSIDE EVERY DEALER

by Q. David Bowers
Part I

Dealers are interesting people, and although it is not always apparent from what you read in print about them, they (actually we, as I am a dealer myself and am part of the group), are human, like to collect things, and enjoy having fun. Recently, the Coin Dealer Newsletter commissioned me to write the present article, the subject being "What Do Coin Dealers Themselves Collect?" I wrote to several dozen dealers and asked them to submit a paragraph or two on collecting interests they had - whether they be numismatic specialties or something out of the field, such as cars, art, or whatever, and to give their reasons for doing so.

One thing soon became evident as replies poured in: there is no such thing as a favorite collecting area or standard specialty for professional numismatists - as a group, they are interested in almost everything! Specific examples follow:

Ed Lee, of Lee Certified Coins, Ltd., Merrimack, New Hampshire, said this: "Since I started in the rare coin business in 1958, I have collected a very wide range of items, including ancient Roman glass, Egyptian artifacts, Chinese bronzes, primitive Early American art, and other interesting items. In recent years I have decided to specialize in two areas: I formed one of the top collections of antique Irish coins from 1020 to 1941. This collection included some of the finest pieces in existence as well as several unique patterns by Morbuducci, the only artist to have made up actual coins for the contest to produce acceptable designs for the new Irish Free State in 1928.

"A direct analogy can be drawn between the Irish committee whose duty was to select the best design based on the style of ancient Greek coinage and Teddy Roosevelt's desire to produce American coinage of classical style which resulted in the St. Gaudens \$20. The head of the Irish committee was the famous poet William Butler Yeats. The coinage committee wanted designs that reflected the Irish heritage so Morbuducci chose Irish animals for his patterns including a horse and bull.

"I also collect rare antique newspapers as they are fascinating and priced at levels where rare U.S. coins were 20-25 years ago. My earliest newspaper is an issue of the Oxford Gazette which was "invented" for the King of England and the royal family who fled London for Oxford as the plague was raging and the King was afraid to touch any of the news books (the predecessors to the first newspaper - the Oxford Gazette) as they thought that the plague could be transmitted via contact.

"When the plague subsided the king returned to London and the first newspaper's name was changed to the London Gazette. The London Gazette is still being printed today which makes it the oldest continuously published newspaper in the world.

"Then there is the time that ancient Egyptian mummies were imported to Maine so that they could be unwrapped in order that their fine linen wrappings could be converted to quality newsprint. At least one issue of an early New York newspaper was printed on "mummy paper." But the question I ask is what happened to all the mummies after they were unwrapped? Will an archeologist 200 years from now come across a graveyard in Maine filled with ancient Egyptian mummies thereby creating a new controversy over who actually discovered America? Could be, but the answer lies in an old newspaper somewhere."

Ed's comments, while a bit more arcane than those of the typical dealer, point out early in this article that few professional numismatists are endeavoring to put together sets of Morgan dollars, modern proof sets, or the like, even though they may handle them in everyday business. Instead, they tend to seek the intellectual challenge of items off the beaten track.

Mark Borckardt, Senior Numismatist here at Bowers and Merena Galleries, is a man of many talents, abilities, and interests - a genuine pleasure to work with on a daily basis. Although Mark would not tell anyone this, I cannot refrain from saying that he excels at both bowling and golf - and has earned many awards in both of these fields. In the area of collecting, his focus is numismatic literature including early auction catalogues, early books on United States coins, and related items. Rather than just collect items for collecting's sake alone, he particularly enjoys acquiring publications with useful numismatic information, including that relating to history and pedigrees. Outside of the numismatic field, he has "dabbled around" with bowling memorabilia.

Bill Youngerman, of Boca Raton, Florida, well-known specialist in gold coin rarities, wrote to tell me that his business grew out of a numismatic hobby which started at age 9. "I began dealing in coins at age 12 and have collected practically everything since then," he continued. He has at one time or another collected "every type of numismatic material from ancients to paper money, as well as odd and curious money and, currently, Confederate State of America paper money." Further: "My other collecting interests have been in American miniature paintings on ivory, ancient antiquities, Western art, and guns." Like many professionals, he constantly seeks new horizons. He recently ordered a copy of a book I wrote in 1972, the 1,008-page Encyclopedia of Automatic Musical Instruments, stating that this is "an area I have been getting more interested in." Who knows what will be coming next!

From way down in Texas, Jim Halperin of Heritage Rare Coin Galleries, wrote to say that his partner Steve Ivy "collects historical documents relating to Texas, and has what I believe is the finest collection of this in private hands. I think state pride was his original motive. Most recently, he acquired one of only two known muster rolls (roll call lists of soldiers) from the Alamo. The other one is in a museum."

So far as his own interests are concerned, Jim noted this: "My collecting habits are more modern and more eclectic. I collect 20th century paintings and prints with emphasis on Maxfield Parrish, Alphonse Mucha, and Thomas Moran, 20th century sculpture mostly by Harriett Frishmuth, 20th century art glass (mostly Tiffany, Daum & Galle), original comic art and mint condition Mad comics and magazines. Except for the comics and comic art, for the most part, what I buy is decorative."

I can share Jim's appreciation for Mad Magazine, for I read it when I was a kid, and still read occasional copies when my own son (Andrew) gets them today. As a writer of advertising and a historian of advertising (numismatic and otherwise) of years past, I appreciate the many satires Mad Magazine has printed on the subject. Apropos of this I remember an "interview" with a discount store, which had on the front a sign which said something like this: "The Lowest Prices in Town! Absolutely Rock Bottom! Prices Cannot Go Lower! Sale Coming Next Week!" The Mad interviewer asked this: "Seeing that your prices cannot go lower, what will you do when you have your sale next week?" The answer was: "We will raise our list prices!"

Another Mad advertising spoof involved advertised airline discount fares, with restrictions in tiny print - the sort of promotions we are all familiar with today in the airline, hotel and travel industry. Shown in Mad was a billboard which said something like: "ROUND TRIP FLIGHTS FROM NEW YORK TO MIAMI, JUST \$19.95*." At the bottom of the billboard was the following in tiny print: "*For Civil War Veterans in uniform, accompanied by their parents. Round Trip Fare for all others, \$500." Anyway, such things are a lot of fun!

Julian Leidman of Silver Spring, Maryland, who is a bourse dealer at more conventions than anyone else I know, wrote to say that he was first a collector and then entered professional numismatics. It soon "became apparent that I couldn't collect and deal in the same items. However, collecting is in my blood." Julian went on to note: "I have collected numismatic items that are peripheral to my main inventory. Included are such items as currency of the District of Columbia, currency of Montgomery County, Maryland, and Maryland and American tokens prior to the

CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

A COLLECTOR LURKS INSIDE EVERY DEALER

(continued from previous page)

Civil War." Outside of numismatics he is working on a set of letters by American presidents, written while they were in office. Then followed an unselfish comment, "Currently, I am very happy collecting coins through my clients' collections. I take a great deal of pride completing and improving collections and consider myself a part of the collections I help with."

Tom Denly, Boston specialist in obsolete currency and other items, wrote: "For me, collecting is a necessity. How can a dealer understand the collector if the dealer himself does not collect? My major collections evolve around my business, with my primary interest being some 645 different obsolete bank notes and scrip pieces issued here in Boston. Many of these notes depict buildings such as the Old State House and Fanueil Hall that are still part of Boston. My second major collection is of large-sized U.S. star notes. I buy large quantities of circulated large-size U.S. notes for resale. Before there was a book on these, I saved those with stars, as I realized how truly rare they are. That small collection has progressed slowly to a collection of 109 different Friedberg numbers with many notes either unique or the finest known. Sometimes I measure a show as a good one if I am able to add an item to either of my currency collections. Other areas of specialty include cast iron banks. Probably these let me relax from my business the most, as they are not involved with numismatics. I also love fishing and am a true sucker for any lure, rod, reel or accessory for which the advertisement says it is 'guaranteed to catch a whale' or whatever! I enjoy the act and relaxation of fishing. Even I, who love to go to work, believe the old saying, 'a bad day's fishing is better than a good day at the office.'"

Bill Christensen, New Jersey professional numismatist and coin auctioneer, told me that if he collected everything he would go broke. However, he does collect some things, including coins, medals and tokens with ships on them, of which he has "only" 4,000 different. He collects tokens from breweries and he is a serious collector of paper money of Central America and the West Indies. Among his non-numismatic collections are toy soldiers of which his "army" is close to 100,000 figures (Pentagon take notice!). Bill says that "my army is bigger than that of the Netherlands." In connection with his brewery tokens he does collect beer cans, of which he is one of the founders of the hobby (the Beer Can Collectors of America - BCCA) - the organization has 35,000 members. He has 60,000 different beer cans from the 1930s to the present from 128 different countries. Bill says he stores them "wherever they fit." Bill says that he acquired most of his cans empty. When the occasional full one is acquired, "I am not averse to sitting down among friends and emptying it," he continued. He also collects models of ships - again something to go with his coin collection. He started the ship hobby at the age of 13 while he was recovering from paralysis in the hospital - it was good therapy at the time. This is one of Bill's smaller collections - he has just "around 2,600 of them."

David W. Akers, specialist in United States gold coins, has hobby interests which include numismatic as well as outside areas. Within coin collecting he specializes in United States gold dollars of the Philadelphia Mint and possesses a complete set from 1849 through 1889, with many finest knowns. "I have collected these since 1952, and I still have many that I purchased in the 1950s and 1960s. I bought these because they were attractive and, at the time, the least expensive U.S. gold coins in gem condition. I was always a stickler for ultimate quality long before it became

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$50.00 for six months, \$89.00 for one year and \$147.00 for two years (California residents please add 8.25% sales tax).

Address all subscription remittances to:

P.O. Box 11099 • Torrance, California 90510-1099

fashionable. Of course, 20 or 30 years ago, quality did not cost that much of a premium. I also am interested in other U.S. gold denominations, including many rarities and finest knowns. I have coins of most denominations, but have no particular rhyme or reason to my acquisitions, but each coin is truly something special."

David also enjoys coinage with the portrait of Queen Victoria, struck at the private Heaton Mint in Birmingham, England, finding that such items offer "incredible quality at ridiculously low prices." Then there is his non-numismatic specialty: "I have one of the finest collections of German 'bathing beauties' ever assembled. Bathing beauties are porcelain 'dolls' or figurines made between about 1890 and 1930. They are also called 'naughty nudies' because some are nude although most have bathing suits of the period. I own several hundred pieces including several unique ones."

Jeff Garrett, President of Mid-American Rare Coin Galleries, Inc., in Lexington, Kentucky, reports: "In the field of numismatics I currently collect Proof Morgan dollars in gem condition. At today's price levels I think they are a steal. They also fit the following criteria: 1. a popular series, 2. beautiful issue, 3. obtainable set, and 4. historically interesting."

However, Jeff gives warning, sort of, that anyone wishing to sell him such had better hurry, for: "My tastes change, so next year I will probably be interested in something else!" Further: "Outside numismatics I collect contemporary art by local artists. Contemporary art is difficult for many people to appreciate. My strict rule of thumb is to purchase only art that I love. The investment aspect is totally secondary, if an issue at all. I also enjoy getting to know the person who created the art. They are quite interesting characters."

We have been meaning to ask Jeff to do some research for us in his home town of Lexington - to see if the Phoenix Hotel still stands, and perhaps to send us a snapshot of it for printing in our company's magazine, The Rare Coin Review. In the 1930s C. Frank Dunn, the distributor of Boone bicentennial commemorative half dollars, had two offices on the second floor of the Phoenix Hotel, we are told, both related to the Boone commemoratives. Dunn was quite a character in his own time, and at one time got in such hot water that he transferred his business assets to his wife's name. Perhaps Jeff could also see if any Dunn family members remain and if they have any Boone memorabilia (Jeff, take notice when you read this article!).

The principals of Stack's, who for years have "held down the fort" in New York City numismatics, each have collecting specialties. The late Norman Stack, who also collected antique weapons, for years busied himself with assembling a magnificent type set of American coinage, which he used to illustrate a book on the subject. Harvey likes Pioneer and Territorial ingots, mostly of the monetary type, in gold, silver and mixed metals, "because of his interest in the history of the Early West, as they relate to the Territorial coinage. He also collects automata, slot machines, Boehm birds, and carousel horses." There is a person after my own heart (I also have a carousel horse or two). Larry Stack "collects the hammered coinage of Great Britain, as he has always liked English history. He also collects paper weights of mostly English and French makers."

As you can see, there is virtually no collecting area that is unknown to one or another in the professional numismatic community. Response was so enthusiastic that the present article is just the beginning - watch for a continuation!

NEED TO MAIL?

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1992 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 6,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!
